at the first sign of illness. Delay is dangerous! Even common colds, if neglected, frequently bring on more serious disorders or complications resulting in prolonged illness. Don't take a chance! And remember, when you have consulted your personal physician, and secured his advice, it is just as important that the prescriptions which he writes and the medicinal supplies which he orders be of the highest quality and prepared with the utmost skill. In this connection we solicit your patronage and offer you the following assurances:

1. Only fully registered pharmacists, qualified by professional training and years of experience, are employed in our prescription department.
2. All drugs and chemicals must conform to the standards established by the United States Pharmacopoeia.
