Copco Will Give Pocket Calendars To All Patrons

Through the courtesy of the California Oregon Power company, each local customer of this well known utility will receive this month one of the new Copco 1931 vest pocket calendars. The new calendar features an attractive picture of the Copco No. 1 generating station located at Copco, California, which is one of the most important power plants of the company's system.

On the reverse side is a complete calendar for 1931 with the quarterly dividend dates on Copco Preferred Stock prominently displayed for the benefit of local shareholders of the company.

This vest pocket type of calendar has proved popular in the past with not only men but women as well. Being a small size it is always available for reference to the man who carries it in his vest pocket or card case and to the woman who keeps it in her purse. The 1931 Copco calendars are being enclosed with all light bills during the month of December rather than by counter distribution, thus assuring that each and every customer will receive one of these handy little calendars.
