An Absurd Ruling

THE absurdities which can arise out of inexpert meddling with the state's higher institutions are demonstrated in the refusal of Dr. Arnold Bennett Hall, president of the University of Oregon, to speak before students of Klamath Union High school because the state board of higher education would consider such action as "recruiting."

Things have come to a pretty pass if the president of the state university cannot be trusted to speak to a group of high school students without seeking to proselyte and to propagandize for his particular institution. Things are in a bad way if the state board of nigher education fears that the inspiration which may come from such an address would lead some student to folfrom such an address would lead some student to lot-low the speaker to college in a year or two, which is probably the nearest thing to recruiting which would will be discussed. arise from Dr. Hall's speaking here,

If the president of the University of California should come to Klamath Falls, he undoubtedly would be invited to speak at Klamath Union High school, and in that case there would, of course, be nothing the state board of higher education could say. Thus, under the present situntion, we could listen to educators from outside the state, but must shy away from our own, who, in the mind of the state board, apparently cannot speak with-

there detailed in situation of stifling the leadership which the people of the state rightfully expect from their higher institutions. The tendency, it seems, it to surround the men and women of these institutions with a barrier of prohibitions and must-nots, which not only take away what the state may expect to gain from contacts with them, but probably take the heart out their work for the institution itself.

As for recruiting, we fail to see any great harm in it if practiced in the right ways. We have no use for their work for the institution to attend the state that the state to devote their lives to the upbuilding of the state to devote

It is altogether proper that Oregon's contribution to waters to be used in christening two great ships at Camden, N. J., should come from Crater Lake. The clear, sparkling fluid from Oregon's "dea of myster" will be gathered along with waters from every other state in the union. And we do not shy from the comparison.
