Joint Tourist Program Good

PUTTING THE 'WONDER' IN WONDERLAND

How Our Relief Needs Stand

Good Can Come From New Group

THIS newspaper has spoken repeatedly of the great importance to Klamath Falls of a heavy tourist visitation.

Where maximum results have been obtained in attracting tourists, it has usually been through the medium of an organization of communities in a region, which can, by cooperative effort, do a bigger job of promotion than is usually possible by a single community.

At Redding Monday, the Shasta-Cascade-Wonderland association, designed to unite some nine counties in Oregon and California into such an organization, will be formed.

The purposes of the Shasta-Cascade-Wonderland association are worthy. They are:

"TO PROVIDE for a long-time master program of tourists development throughout this region.

"TO MAKE better known to the world the scenic attractions of this region; to make them more accessible and to make their occupancy more comfortable for the tourist and vacationists.

"TO DEVELOP a spirit of appreciation and cooperation among all organizations and citizens of this region.

"TO COOPERATE wherever and whenever possible with other organizations and agencies outside this region and coordinate their efforts to the end that the Shasta-Cascade Wonderland may be better known and render its full share of outdoor enjoyment to the many other opportunities of the Pacific Coast.

"COVERING ALL this should be a special attempt to conduct the work of tourist promotion in a business-like manner that shall yield good dividends to the region."

The Klamath Basin, which possesses a generous share of the wonderland denoted in the name of the organization, does well to take an active part in the program indicated.

That Football Score

APOLOGIES are due the Klamath Union High school. This newspaper yesterday re-printed from a Medford paper football scores of the past season, one of which was 109 to 9.

The score was given for 1921. Principal Paul Jackson reported that the records available do not go back that far. But now a staunch alumnus of Klamath Union High reports he has an annual for the year mentioned, and that the score was 19 to 9. Quite a difference, and apology is due.

GEMS OF PERIL

CHAPTER IX

Eddie did not recover consciousness sufficiently to tell his version of the story before he died. There were hours of suspense, for he was young, and dying did not come easy to him.

Sometimes he moved restlessly and babbled. "Maybe he's trying to tell us something," Mary suggested. But the others did not believe it; they were pityingly silent.

"Down drew Dirk aside out of Mary's hearing and let his wrath explode. Dirk blamed himself miserably for his failure to reach the rendezvous at the appointed time, and what the reporter told him did not make him any happier.

"I tell you I saw it! It was murder—pure murder! Two feet further over, and they'd got me, too. By God, to get that guy I'd turn this town upside down!" "Get away!" "Clean. I tell you it was all carefully calculated to the minute. Whoever it was took a big chance, swinging around under these L pillars. Just as he turned the corner he flooded the carburetor and the number plate was hidden by smoke."

Klamath's Claim for Roads Valid

TWO outstanding features of the Devers unemployment report, submitted to Governor Meier Thursday night, tend to offset each other. The report shows clearly that the problem is a large one, but it also shows that there is wide-spread recognition of its magnitude and a determination to meet it.

Mr. Devers, who is attorney for the state highway commission, made a comprehensive study of the situation, and his figures may be considered as authentic as any could be. He estimates there are 20,000 persons out of employment, and that this means there are 60,000 persons who must be cared for in solving the unemployment problem.

These figures, at first glance, appear prodigious. They tell plainly enough that we face a real problem. But when we remember that the state highway commission has determined to spend between \$1,000,000 and \$2,000,000 on work to aid unemployment, and that considerable sums are to come from the federal government, particularly for road work, as well as smaller amounts from various counties and municipalities, the situation does not seem so grave as at first feared.

The report by counties shows definitely that Klamath county has a valid claim for generous consideration in the allotment of funds for forthcoming highway work. If Mr. Devers is correct, there will be unemployed here, with 4500 actually dependent upon what may be done to relieve unemployment.

In this county, we are organizing a vigorous effort to help ourselves as much as possible. Not shirking our duty in this regard, we deserve favorable consideration when state and federal funds are spread to relieve unemployment conditions.

Bridge Job Should Go Ahead

PAVEMENTS, slippery with frost and rain, are with us again, and the danger spot at the Esplanade bridge is as dangerous as ever.

If improvements are to be made there as indicated by city officials, they should be pushed without further delay. Incidentally, J. E. Mackie, wood extension specialist, gave some pertinent and worth-while facts about the practicability of using wood in bridge construction when in Klamath Falls the other day.

dreamed could happen. That was that nothing happened at all. The days went by as usual and there was no news of the sort she wanted to hear. Day after day her hopes rose, only to crumble again.

The big black car had got away clean; no one but Bowen and herself apparently witnessed that lightning swerve that had killed as neatly and deliberately as a bullet, and the speeding car had swung around the corner before anyone thought to look at the number. In no time at all it had turned into Fifth avenue, apparently, and in the late Saturday afternoon crush of traffic been effectively concealed.

At first Mary was incredulous. It wasn't right or possible that such a thing could be. Complete immunity for such a cold-blooded murderer upset all her ideas of justice and led her to think, not quite kindly of a Providence that let such things be.

The private investigators hired by Mr. Jupiter to study his wife's murder—they were the two men who had been hired to protect her and had failed so disastrously—were joined by two of their confreres. But the search led nowhere. There were numerous Lorimers in town, even a few aluminum-fitted "special jobs," but they were all in the possession of well-to-do citizens with the most unassailable reputations.

The car that had dealt the death blow had vanished off the face of the earth. Probably, they reckoned, locked in a private garage somewhere, where it would remain until the affair should have been forgotten, when it would emerge repainted. And, unless there was a tip-off, might go undetected altogether. If it had been a "hot" car (that is, stolen) it would have been found deserted.

The fact that it was privately owned added to the strength of the rapidly growing theory—now that the first flush of indignation had passed—that Eddie's death was an accident, and not, as George Bowen of the Star, alone among all the metropolitan newspapers, insisted, caused by a "murder car."

At last even Bowen bowed to the strength of opposite opinion, apparently, for he stopped chiding the police department for its imbecility, and even stopped writing any more about the case. Some were happy at his sudden silence, than Inspector James Kane.

Fashion Tips

Most women like autumn and winter a great deal more than they do spring and summer. They look and feel smarter in the gay-colored sheer woolen dresses for sports, street and office wear than in the prints, silks and chiffons of summer.

Evening dresses of soft chiffon velvet and satin are much more flattering than the wispy chiffon prints of summer. It's exciting and exhilarating to replenish the wardrobe with fall and winter clothes, and one takes more interest in the whole business of shopping and going to the dressmaker's.

The makeup and cosmetic supply will have to be replenished, too. You need more creams, fewer astringents, less rouge and more lipstick. Winter dries your skin more than summer. Each time you come in out of the cool (it may even be cold) air, cleanse your face with cream and then don't make it up again immediately. Give your skin a chance to breathe. Unless your skin is naturally extremely oily, you won't need to use an astringent more than two or three times a week during the cold months.

In summer, when your face is inclined to be slightly damp most of the time, rouge quickly disappears. Hence, you apply it oftener and more generously. A coat of tan looked smart in contrast to the white and pastel shades you wore at the resort but it won't look smart at all if you show up at a formal dinner with arms and shoulders that aren't white and smooth to complement your new velvet evening gown. Use a bleaching cream until your skin is creamy soft and white once again. Remember that liquid powder is fine for your neck and shoulders. It won't rub off while you are dancing.

You can give your nails more fastidious attention. Golf, sand on the beach, riding and innumerable other things probably made your nails a little rough and dingy. Keep a half of a lemon over your sink or on the bathroom shelf and rub your nails into it three or four times a day. It doesn't take but a few seconds and you'll be surprised what it will do toward bleaching your fingers and nails. You can probably wear a more vivid shade of polish now—not scarlet, please, and perhaps you will want to wear your nails a trifle longer too. Be as ravishing as you choose. Winter is the time to "express your self."

Bowen masked the interest that this information had for him. "Oh, very likely. Funny, though—he's been talking about a fly in there." He nodded toward the door of the hospital room. "Mmm. Well, I'll be getting along. I'll fix it with the hospital to call me if he dies. Kane's coming over, I expect?" Dirk nodded reluctantly. "He's on his way. Wants to talk to the kid, if there's any chance at all." The door of the boy's room opened a crack, and a nurse beckoned. "Mr. Ruyther! Please!" Dirk pushed hurriedly inside, where there was the sound of hushed sobbing. The nurse closed the door, shutting herself and Bowen out. "He's gone," she said. Bowen said, "Where's the nearest phone?" and followed.

SIDE GLANCES By George Clark

"What'll I do, Mae? The coach makes me stay home every evening, and you probably wouldn't give me a date if I wasn't on the team."

Health Talks

Among the agonizing pains that afflict mankind, earache ranks next to toothache in frequency, and probably next to what is called a "jumping" toothache for painfulness.

Dr. Joseph Hopper lists some of the common causes of earache. The average man can guess at the cause of his stomachache or even at the cause of his headache, but he will do little with trying to determine the cause of the earache because an inspection of the ear by some one trained in the examination of ears is necessary in order to make a certain diagnosis.

Sometimes an earache is brought about by a boil or an inflammation in the canal leading from the exterior down to the ear drum. There was a time when any good toilet kit had an ear spoon as one of the accessories. The ear spoon disappeared long before the toothpick lost caste in polite society. It is now good advice never to put anything into the ear smaller than the small finger of the second toe. When a boil begins in the canal, it is accompanied by swelling, and the swelling means pain. The boil in the canal will come to a head just like a boil anywhere else in the body. When it comes to a head it bursts and the swelling is relieved. With the relief of swelling comes relief from the pain. When there is a boil or even a severe pimple, pulling on the ear is painful and pressure in front or behind the ear, even as slight as may be brought about by chewing or movement of the jaws will exaggerate the pain. In such cases nothing at all may be visible from the outside. However, the physician who looks into the canal will see the swelling partially blocking the view down to the ear drum, and he can apply antiseptic substances to interfere with the growth of the germs, hot applications to soothe the pain and tenderness, and finally he can puncture or lance the boil to expedite the removal of its contents.

In the meantime, it is well to remember that a boil begins where the skin has been broken or irritated, and that any manipulation of the canal for the removal of wax or the use of any hard instrument inside the canal may be the first step toward the formation of a boil.

The second and more frequent cause of earache is infection behind the ear drum. This usually occurs from extension of infection in the throat through the eustachian tube. This tube connects the back of the nose with

Today's Recipes

Many of our pet superstitions about foods, cooking methods and digestibility are being shattered by scientific investigation and research. Some of the beliefs are based on prejudice and tradition, others on the unhappy experience of a few individuals with digestive peculiarities, and almost none on a sound knowledge of nutrition.

There are, of course, some people with whom certain foods do not "agree." When this is discovered it is well to avoid those foods. One should be sure, however, that the idiosyncrasy is real and not fancied.

Persons who are in normal health and who do not over-indulge in some specially liked and delicious food may enjoy almost any palatable combination with no misgivings.

The fish and milk combination always a much discussed question. All authorities now agree that fish and milk "are in perfect harmony, like all simple, wholesome foods." I quote from an article on this subject in one of the current magazines.

One fallacy that is quite commonly encountered is the one that acid foods produce acidity in the system. The taste of food is no guide to its final reaction in the body, for it is only after the system has made use of its fuel that the nature of the ash can be determined. Some foods after being digested and utilized by the body have an acid reaction in the blood and others are alkaline in reaction.

Although lemons are sour to the taste because of the organic acids they contain, the effect of the lemons is the effect of its ash, which is basic, not acid. Apples, bananas, muskmelons, oranges and potatoes have been found experimentally to be very efficient in reducing body acidity. The practice of eating acid foods in the same meal with milk or of using milk or cream on fruits is censured by some persons. However, the acid is actually a help rather than a hindrance to milk in digestion. It is a common practice to heat orange or lemon or tomato juice into milk or to sour milk artificially for persons with weak digestion.

Acid fruits do not interfere with the digestion of starchy foods. Pancakes, waffles, muffins and hot breads of all sorts are not in themselves unwholesome food, but they have a bad reputation with many people. In the first place they are usually eaten without proper mastication on account of the softness in structure. Second, they are often served with much butter and a syrup of some variety and the tendency is to eat largely of such combinations to the exclusion of other

more essential foods. Third, they are very appetizing and cause most people to overeat. Even in no larger amounts than plain cold bread with no greater amounts of fat or sweet, and chewed thoroughly, they should be as easy to digest as cold bread. Veal is no more indigestible than fish, chicken or beef. In France it is given to invalids as we give chicken in this country.

Earlier Days

October 24, 1913 K. C. H. S. G. Ashland 6.

This was the result of today's game between the rival high schools, which was hard fought throughout. Had it not been for the decision of Referee Earl Elliott, the score would have been in favor of Klamath Falls.

Elliott held that a touchdown made by McClure in the second half was made on an off-side play, and instead of allowing the touchdown he penalized the Klamath Falls team.

The threshing crew on the Klamath Indian reservation expects next week to finish the work of threshing out the grain raised by the Indians this year. From the very start of the season the threshers have been kept steadily busy so large was the crop this fall.

The skin of the bear which Fred Noel killed a few days ago near Silver's camp on the Rogue River has been transformed into a beautiful rug by Walter Donat. Mr. Noel will present the rug to his daughter, Miss Nina. Bear skins are usually not at their best this time of the year, but this one seems to be an exception. For the fur is as thick and glossy as any ever taken in the coldest season. This is the second time Fred Noel went deer hunting and bagged a bear, and this one was killed near the scene where the first one was killed.

Some Wise Cracks

Sage comedians have been warned to soft-pedal depressing humor. Theatre operators probably can't stand it.

Holding up 14 women in a bridge party is a precarious business. In fact supporting 14 women is a job any time.

While Almee and Davie are reviving everything else in erudite Boston, there's grave danger of reviving a new flock of absent-minded professor gags.
