

WALTON TELLS OF RED CROSS DROUGHT WORK

How the Red Cross spent its \$10,000,000 drought relief fund, toward which Oregon contributed \$4,157,94, is told in a report made public today by George Walton, secretary of the local chapter.

In the amount of territory affected and the number of individuals helped, the drought eclipsed any other calamity in recent years. It spread over 23 states, leaving 614,000 families estimated at 2,765,000 persons, dependent upon the Red Cross for aid during some period of the emergency. That figure more than quadrupled the number requiring assistance during the Mississippi Valley flood of 1927 which, up to that time, had been the red cross's highest assignment of its kind.

Drought sufferers received their supplies by means of distributing orders made payable to the stores where the beneficiaries ordinarily traded. In that way the normal channels of trade were undisturbed. Many storekeepers, particularly in the smaller communities, assisted almost solely on Red Cross business during the most trying days of the emergency. Drought victims exchanged their food orders for supplies, and their merchants in turn forwarded the orders to the Red Cross for prompt payment. Six hundred and twelve carloads of donated foodstuffs were sent into the drought area by railroads or manufacturers of other states, but these supplies were so distributed that trading at the local stores was not noticeably interrupted.

Evidence of the thoroughness of the entire relief program is brought out in the fact that the Red Cross provided the beneficiaries with balanced diets. Even the donated supplies, for the most part, were appraised in warehouses by the agencies, then were divided in such a manner that when the care reached the beneficiaries they contained the most healthful assortments of foodstuffs possible.

In hundreds of rural schools of the drought area lunches made possible by Red Cross funds were served regularly to the pupils. In most communities where this project was carried out, serving generally was done by school patrons, home economics classes or Junior Red Cross members. In some communities the home demonstration agents supervised the work. Faculty members cooperated throughout the drought area. Increases of attendance marks and better weights and mental attitudes among the children were the results.

Supplementing the general feeding program was the distribution of packages of garden seed to 403,422 families. The packages contained from 14 to 18 varieties of vegetable and were delivered with the cooperation of various state and federal agricultural extension agencies. This seed program resulted in bumper vegetable yields in some of the most acutely affected sections, thereby allowing many of the Red Cross beneficiaries to return to a self-sustaining basis at a much earlier date than otherwise would have been possible. These Red Cross gardens produced fresh vegetables with an estimated retail value of \$20,000,000.00.

Oil-burning locomotives have been in operation since the early '90's.

Half the gloves made in America are made in and around Gloversville, N. Y.

Children Must Be Trained Differently

SALEM, (UP)—Train your child to record with economic changes.

That's the way from Secretary of Interior Roy Lyman Wilbur to the state department of education.

"Youth must be educated to accommodate itself to our transition from an agricultural era to an industrial age," Wilbur said. "Failure to do this may cost us a price far beyond the apparent advantages we have gained."

Dairymen Asked To Cull Herds

SALEM, (UP)—To prevent overproduction of milk, dairymen of Oregon and other states are urged to cull one cow in each herd of 10.

Attention of overproduction of the industry will be brought before federal and state agencies by the Dairy Advisory committee, representing the dairy cooperative association, the federal farm board advised.

Fiftieth Anniversary Poster

A pretty, 20-year-old bank teller of Phoenixville, Pennsylvania—Miss Margaret Will—served as the model for the Red Cross poster this year, and thus entered into the halls of everlasting fame.

This particular poster marks the fiftieth birthday of the American Red Cross. The original poster will be preserved in the Red Cross museum in Washington, and the reproductions will undoubtedly be used in 1931—when the one hundredth anniversary is observed—and in 2931 and through the birthdays of the Red Cross in all the future centuries.

Joseph M. Clement is the artist of this effective anniversary poster, which follows out the slogan of the Red Cross birthday—'Fifty years' service to humanity.' Mr. Clement has a studio and home on old mill property at Chester Springs, Pennsylvania, and thus looked about the neighborhood for local talent and discovered Miss Will—who has posed for several of his works.

NEW BUICK TO BE SHOWN SATURDAY

The principles of "wizard control" will be demonstrated at all Buick showrooms the country over Saturday, when the new Buick for 1932 is shown for the first time. The cars are being displayed here by H. E. Hauger, Buick dealer in Klamath Falls.

"Wizard Control" has aroused much discussion since the preliminary announcement of the new Buick was made last Sunday. It results from a new method of car control through the use of an automatic clutch, operated by power, plus improved free wheeling, and a new synchromesh transmission with silent second gear, said to represent the finest engineering Buick has ever attained in a unit of this kind.

The presentation includes an extensive line of twenty-six new models, the most complete line ever built by Buick, grouped in four series, with smart, modish bodies by Fisher and a score of brilliant engineering features.

GOOD RECORD MADE ON T. B. TESTING

Out of 2,900 Klamath basin cattle tested for tuberculosis during the past fortnight by Dr. F. H. Thompson, federal veterinarian from the United States bureau of animal industry, only five were found to be reactors, according to announcement from the county agent's office.

Testing for tuberculosis is carried on annually by the United States bureau of animal industry in cooperation with the county agent's office.

The reactors are slaughtered as soon as the disease is detected. Out of the five reactors found in this community, the county agent stated that four had been imported from California during the past year. Dr. Thompson completed T. B. testing Friday afternoon.

Husbands Warned To Shun Kitchens

SALEM, Ore. (UP)—Husbands, stay out of the kitchen.

Such is the advice of an officer of the state fire marshal's office, who says it's not only advice, but it's a request, warning, ultimatum, demand—anything that will be effective.

"Men are innately unfitted for kitchen work," he said. "Moreover, they're a life menace. They sleep, drowsy and inert, in their work, which causes numerous fires."

Pit River Squaw, Reputed to Be More Than 100, Dies at Alturas

ALTURAS, Calif. With the passing of Lucy Dickes, aged squaw of the Pit River Indian tribe, the back streets of this city will be missing a colorful and familiar figure. Born in 1830, she was currently reputed to be over 100 years old.

However, officers of the Indian Bureau state that she was somewhere in her eighties, since she was quite a young woman with wavying hair when the battle of the Infernal Caverns was fought near here by General Crook's command in 1857.

The old woman was an expert basket maker and pursued her occupation almost up to the hour of her death. While foraging around the streets for stray bits of food she always left her bundle of skelets at the office of the Alturas Phintinsler for safekeeping. Her basketry work has been unexcelled among Indians in this locality. Lucy Dickes saw the first white settlers come into Klamath county and well remembered the time when she had never seen a white man.

Registration Of Motor Vehicles To Exceed 1930

SALEM, Ore. (UP)—Non-resident motor vehicle registrations in Oregon this year probably will exceed last year's mark of 93,171. Up to November 1, 37,533 vehicles from other states had registered within the state's borders. In November and December last year, 6,242 registrations were recorded.

Six countries and 25 states were represented in the 3,527 registrations during October. It was the best October registration since 1924, except that of 1929.

Klamath Falls reported 423 registrations for October, and 4526 registrations from January 1 to October 1.

Registrations from California in October numbered 3,679; Washington, 1,357; Idaho, 271; and Canada, 106.

The peak year for non-resident registration was in 1929, when the 102,008 mark was reached.

BONANZA MAN IS HURT IN MISHAP

Don Hodgett, of Bonanza, sustains painful injuries Thursday evening, when a broken radius rod caught in the spokes of a wheel and overturned his automobile near Bonanza.

The wreck was investigated by state police officers who arrived at the scene shortly after the accident and took the injured man to his home.

Hodgett suffered a severely wrenched neck, bruises and lacerations, none of which is believed to be serious.

Government Job Exams Announced

The United States Civil Service Commission has announced open competitive examinations as follows:

Guard (penal and correctional institutions), \$1,650 a year, penitentiary service. Closing date, November 23, 1931.

Principal physiological chemist, \$3,600 to \$6,400 a year, Bureau of Construction and Repair, Navy Yard, Washington, D. C.

Closing date, December 1, 1931. Division leader, \$5,000 to \$6,400 a year, Bureau of Entomology, Department of Agriculture. Closing date, December 1, 1931.

Economic analyst (urban real estate), \$3,800 a year, Bureau of Standards, Department of Commerce. Closing date, December 1, 1931.

All states except Delaware, Iowa, Maine, Maryland, Vermont, Virginia, and the District of Columbia have received less than their share of appointments in the above mentioned departmental service at Washington, D. C.

Full information may be obtained from Lulu B. Hutchens, secretary of the United States Civil Service Board of Examiners at the post office.

Brush In Modoc Forest Is Fired

ALTURAS, Calif.—With a general storm of rain and snow ranging from three to four inches in all parts of the Modoc national forest, forest rangers are engaged in burning brush resulting from timber cutting during the past season. Brush is also being burned by the U. S. forest service along the routes of the new highways and roads constructed during the present season a distance of almost 500 miles.
