

Pumping Plant For Fire Station Completed

FIRE STATION CONSTRUCTION BEING RUSHED

Installation of the pumping plant in the deep hot well at the new city fire station was completed Saturday morning, according to an announcement from E. K. Looney, general contractor. This pump will send water through the building, furnishing heat as well as hot water for showers and baths.

The drive line of the pump is 400 feet into the well in order to secure water having the highest temperature. Radiators are being set in place on the second floor of the building, and hot water will be turned on early next week.

The second floor of the new \$30,000 central fire station is rapidly nearing completion. All the floors are of hard wood, and the walls are finished in paneling of knotty pine finished in a natural light green stain, and waxed to bring out the beautiful grain of the wood.

The fireman's lounge and recreation room is 37 1/2 feet long by 15 1/2 feet wide, with large windows on two sides. The room will be utilized as a reading room and for social functions for firemen and their wives.

The fireman's kitchenette and dining room adjoin the lounge. French doors connect the dining room with the larger lounge room, and the kitchenette is complete with built in fixtures, an electric stove and other modern conveniences. The walls are finished with a washable preparation to insure cleanliness.

The large airy dormitory room at the new station will accommodate 18 beds without crowding, and is furnished with double cots to the pole leading to the room to insure speedy response to alarms.

Sixteen lockers, all capacious and well ventilated, are being built in for the firemen's convenience, and clothes closets are provided for volunteer firemen and visitors.

Officers quarters, consisting of a roomy office room and sleeping quarters with direct access to the alighting pole, are also provided. An assistant fire chief will be on duty in this room at all times, according to Fire Chief E. A. Taylor. The alarm system extends to the officers room.

The station is equipped with intercommunicating house, telephones, which were installed as the gift of Chief Taylor, and the unique feature of the second floor of the new station is a drying room, provided for drying the fire hose and wet uniforms of the men.

This room is all metal clad, provided with special heats and ventilators, as well as drainage pipes. It was designed along the same specifications as drying rooms in dry cleaning plants.

The large shower room will be furnished with two showers, a porcelain bathtub, the gift of the firemen to the new building, special lights and plate-glass mirrors. The floor of the shower room is to be tiled in green and white, with a black border.

Two immigrant parties, traveling some five or six miles apart, that camped somewhere down in the lower part of Warner valley. During the night, the leading party was attacked by Indians and massacred practically to a man.

This party included a man who was taking \$4,500 in gold coins with him to the new country, which hoard he buried in the ground every night when he went into camp.

He is assumed to have buried this money on the night of the massacre, and there has been much searching for it in the intervening long years.

Another party, so the legend runs, crossing over from the Surprise valley, in northern California, to the Goose lake valley—later, apparently, after the wet cycle began—came in sight of Goose lake and mistook it for an arm of the Pacific ocean.

So, up there on the low pass, they organized a celebration to mark the end of their journey, and they must have had quite a time of it, if the legend is anything like accurate. Making whoops, in the manner of the time, they danced the fandango, and so the pass came to be known as Pandango pass.

The next morning, the story runs, they, too, were set upon by Indians, and many of them lived to learn that they had not actually reached the Pacific.

No effort is here made, it should be understood, to achieve historical accuracy. What is here set down is merely what has come down deviously by word of mouth.

But some organized effort ought to be made to collect and publish the history of this Old South Road. It would be a fascinating tale.

LAKE county, as set forth in this column yesterday, contains an astonishing number of interesting things.

One of these interesting things is a herd of 10,000 antelope, ranging the Warner antelope refuge. Only here—that is, in this corner of Oregon, California and Nevada—can wild antelope still be seen on the open plain.

These antelope will be a great tourist asset when more people know about them.

THIS whole Southern Oregon and northern California country, traversed by this Old South Road, from old Fort Hall clear to the Rogue and Umpqua valleys, is rich in tradition, fairy steeped in romance.

Someday, if its attractions be properly set forth, it will be one of the great tourist regions of the West, drawing tens of thousands of visitors every year.

Youthful Vagrants Are Sent to Jail

Two youthful vagrants who were arrested in the Southern Pacific yards Friday night were sentenced to 30 days each in the city jail by Police Judge Roy Fosch Saturday morning.

When the boys agreed to return to their homes in Washington they were released on condition that they start for home immediately.

William Kress was arrested in room 22 at a local hotel by city police and is charged with possession of liquor. He will be arraigned late this afternoon.

Roosevelt Off to Enjoy Vacation

NEW YORK, Nov. 19, (AP)—Governor Franklin D. Roosevelt, off for Warm Springs, Ga., doesn't expect to hold any political pow-wows while he is in the south.

"Not this time," he said as he boarded a train last night. "I'm away now on a lark."

An orange contains about 87 per cent water.

THESE NEW MEXICO STUDENTS MODEL POTTERY, MAKE JEWELRY, WEAVE AND PAINT WHILE MASTERING THE THREE "R'S"

By NEA Service
SANTA FE, N. M., Nov. 22—"Through this doorway, in the patio, we shall conduct the classes on pottery, weaving and modeling."

Mrs. Atwell Moore pointed out wooden benches in the garden of the Brown-Moore School for Girls, which she heads. It is here that girls from 8 to 18 years of age will pioneer in a new "two-in-one" educational field. They will do a constructive work while mastering the art of the great southwest—at the same time that they learn more academic lessons.

This, the only boarding school in New Mexico, is housed in two long adobe buildings charmingly furnished and picturesquely located at the end of the Santa Fe trail. The students will be required to devote time to at least one craft in addition to mastering the three R's according to college requirements, but academic standards will not suffer because of the artistic or scenic advantages of the school.

Every girl may take her choice of craftsmanship—perhaps she will like to model pottery, to make silver jewelry, to carve wood, to weave or to paint. There are ancient arts in this country enduring through the ages. The girls see this art first hand and in its native setting in trips to pueblo villages, to fiestas and through Santa Fe, the second oldest city in the country.

Fireplaces in Each Room
One of the two adobe structures which house the school serves as a dormitory and the other is used for classrooms. A fireplace is built in every bedroom, and in the dining room one large fireplace burns on brick evenings when the girls gather around for games and radio entertainment.

The adobe walls around the school are gay with hollyhocks and flowering vines while the old Spanish door that opens into the patio has a cordial creak to its great iron hinges. Here a century-old bell dings out the signal for meals.

Not far distant from the school is Taos, an art colony where men and women of letters are studying Indian art and the New Mexico country. It is the land of Oliver La Farge, Mary Austin, Rachel Crothers and legends of artists who visit or reside there and become guest lecturers to the Brown-Moore School.

Every day is a riding day at the school with an instructor at hand to supervise this as well as tennis, field hockey, basketball and other games.

Despite the fact that so much attention is paid to outdoor life and handicraft, scholastic standing is not neglected. Mrs. Moore, with a degree from Mt. Holyoke and Yale University, and Miss Justine Brown, graduate of Oberlin College, are headmistresses of the school. The actual Indian handicraft work is a feature, Mrs. Moore feels, which will give appreciation to future academic life, rich as it is in its association of history, folklore and science.

Colorful adobe structures house the Brown-Moore School for Girls in New Mexico. Above is a view of the school's dining room in one of the buildings, with a comfortable fireplace in one corner. From Indiana, such as the woman seen at the far right, the girl students will learn the art of fashioning pottery. Mrs. Atwell Moore, at the immediate right, is head of the institution—the only boarding school in New Mexico.

LARGE SPUD SALES MADE DURING WEEK

An increase in potato prices offered by local dealers has resulted in the sale of many large lots during the past week, according to County Agent C. A. Henderson.

Now that fall digging is over, growers are not inclined to sell unless they get reasonable offers, the county agent stated. This has resulted in an improved market over that of a digging time, creating a fair demand for spuds of good quality.

Shipments are going ahead at the rate of 15 to 25 cars per day, and a total of 500 to 600 cars has been shipped to date.

BAPTIST CHURCH WILL BE OPENED

Sunday has been set as the opening day for the new First Baptist church building at the corner of Eighth and High streets which has been under construction for the past three months.

A special program will be given at the morning services, at which time the church will be formally dedicated. The pastor, Rev. Leonard B. Sigle, will speak on "Loyalty to Christ." A duet, "My Prayer," will be sung by Mrs. DeWain DeLap and Mrs. J. A. McCluskey. H. Gordon McCall will sing "For God So Loves the Grass." Mrs. D. L. DeLap will direct the choir in singing "Sing to the Lord a New Song."

Appropriate services will also be conducted by the Sunday school class, and all pupils are urged to attend.

A special program is prepared for the afternoon beginning at 3 o'clock. Jubilee singing by the choir and congregation will mark the occasion. Short talks from individuals connected with the church will be as follows: Charles R. DeLap will give a history of the church during the past 47 years.

Other talks will be as follows: The significance of the building move, S. E. Malin; the women's part, Mrs. Ray Hussaker; young people, Joe Grist; what the church stands for, George O. Welch; the future of the Sunday school, George O. Welch; the revival we seek, Vernon Hughey.

Another vocal selection, "Next the Old Olive Tree," will be sung by Edna and Hazel Michelson. Instrumental numbers will be given at this service by members of the church.

Turkey Dinner to Be Served Sunday

Turkey dinner with all the trimmings, will be served at the Sacred Heart parish hall Sunday from noon until 5 p. m. by the ladies of the Sacred Heart church. The public is invited to attend the dinner and stay during the afternoon. Cards will be played during the afternoon.

The money raised will go to the charity fund of the church to assist in giving Thanksgiving dinners to others who are unable to afford them.

Sleepless Fish
Fish cannot close their eyes and therefore they are unable to sleep in the ordinary sense of that term as applied to mammals. They have periods of less activity during the day and during that time they rest.

Headhunters of Formosa are separated from the Chinese and Japanese colonists by a 250-mile electrified wire fence.

ARMY LEADER IS KLAMATH VISITOR

Major Ernest Higgins, new divisional commander of the Salvation Army work in Oregon and southern Idaho, with Adjutant Ronald Eberhart, visited Klamath Falls, for the first official visit here since his installation meetings in the Portland headquarters.

The Major was impressed with Klamath Falls as a city, and expressed his belief that when things break for the better, Klamath Falls will be among the first of the cities to benefit.

Members of the advisory board of the local corps met with the
