GROWTH SEEN IN RELIGIOUS INSTRUCTION

A meeting of the advisory board of the organization carrying on the work of religious instruction in the public schools was held in the rooms of the Public Library Monday evening to hear reports and discuss plans. Rev. T. Davis Preston, chairman of the board presided and there were present representatives from the following Parent Teacher associations: Conger, Riverside, Fairview, Mills and Fremont; and from the following churches: Presbyterian, Christian, First Baptist, Immanuel Baptist, Klamath Temple and Congregational. Percy Wells, superintendent of schools represented the schools.

Rev. Preston outlined the work of the past and explained that this was the first meeting of the enlarged board. The work he explained, was growing and increasing in popularity. The present teacher, Miss Dorothy Smith, was conducting classes in all seven city grade schools among the pupils of the fourth and fifth grades. In her report she said that there was a total of 419 pupils in these—239 in the fifth grade and 171 in the fourth grade, these were distributed among thirteen classes in the seven schools. Notebooks were displayed to the board which indicated an interesting and worth-while course of religious instruction.

Included in this course is instruction in worship, prayer, memory of scriptures, trustworthiness, clean speech. The general aim of the course being to have the truths of the Bible work out in the every day experiences of the children.

Proceeding the business meeting of the board a group of children gave a Biblical dramatization and conducted a worship service. The report of the treasurer, Mr. J. A. Leech showed the salary paid to date and part pledged for the remainder of the school year. Plans for the future were discussed and the hope expressed that this valuable non-sectarian work of religious instruction would have the full sympathy and support of the citizens so that in the near future the instruction might be extended to all grades of the schools.

Harmony Circle—A general meeting of the Harmony circle will be held at the First Christian church, Thursday afternoon, at 2:30. All members are urged to be present.

back into the banking business. Whereupon the rumor arises that he is REALLY going to become a candidate for President. Dawes, in his characteristic manner, discusses this talk with the brusque statement: "It's all damn nonsense. There's nothing to it, and I won't even discuss it."

DAWES, you see, isn't a politician. If he were, he would give a cryptic answer, such as Coolidge's "I do not choose to run," and then would sit back and wait and HOPE and if the ensuing talk were even halfway favorable would figure out another cryptic statement to str up MORE talk. Then he would put himself in a position where the lightning could hardly help striking him if it struck anybody at all.

That is the approved political method.

CHANCELLOR BRUENING, of GERMANY, says:
"Continuation of reparations payments is impossible and any attempt to maintain them must lead to disaster, not only for Germany but for the whole world."

What he probably means is that Germany ISN'T GOING TO PAY any more reparations.

GERMANY, before the war the leading industrial nation of Europe, pre-eminent in scientific progress, making tremendous strides in business development, headed for a place in the sun if ever a nation was, is now humbled, her glory gone and her future far from bright.

She got exactly what was coming to her, because her sword-rattling, senseless leaders, puffed up with ancient ideas, couldn't see her amazing progress in any other terms than those of military conquest. So they went to war and proved the dictum that "those who live by the sword must perish by the sword."

They ruined Germany. And Germany, because she stood for these leaders and supported them

in their medieval ideas, deserves what she got.

BUT this puny individual, speaking for himself alone, holds the opinion that Germany has been punished enough and that the effort to impoverish her further by demanding tribute throughout another generation will merely react upon itself, holding back the industrial recovery of all Europe.
