The Trend\* of fashions for SPRING \*as seen by Mrs. Charles LaPointe, now buying for spring in the style centers of the United States. WE NOTICE, that Crochet touches, scallops, and fagoting are used to define yokes, raglans and diagonals. LATE AFTERNOON and DAYTIME STYLE: The conflict between milady's inclination for sophisticated simplicity and the persistent whim to be pampered is largely responsible for the introduction of real lace trimmings on manly-tailored dresses. Necklines are high and round, square and simple, and frequently softened by clever manipulation of a scarf, cape or bows. This method of broadening shoulders tends to focus the center of sleeve interest between elbow and wrist. Until the warm weather sets in, long sleeves will be preferred. Raised waistlines are featured primarily in the late afternoon types. Dresses suitable for more practical use resort to adjustable belts and sashes for high waistline effects. Bodices are often supple and slightly bloused, but those accenting the shaped outline will be promoted. Hiplines are entirely unencumbered for the most part, and diagonal seamings, goring and closings are used freely. Skirt fullness is usually absorbed by the grouping of inverted, pleats or graduated tuckings. Jackets complement a goodly number of one-piece dresses. As a rule, jackets are collarless, with tucks providing shape and decoration. Skirts end at the bottom of the calf. FABRIC: Silks are dull, ribbed, crinkled, and largely of the Canton or Hoshanara varieties. Crepe Marocain is a new fallie Canton or Hoshanara varieties. Crepe Marocain is a new fallie sheers, Crepe Jericho is outstanding, despite the fact that it is featured in printed versions. Printed crepes are clamoring for attention, but only the diagonals, the sun-burst patterns, and the screen prints are being heeded. Screen prints can be found in better dresses only. LaPointe's
