

GOVERNMENT TO REGULATE WOOL SALES

With approximately 75 per cent of the wool crop in the Klamath empire owned by borrowers from federal credit agencies, interest is strong here in the announcement that the government will require the 1934 clip to be handled on a consignment basis as was the case last year.

The federal intermediate credit banks, the production credit associations and the Regional Agricultural Credit Corporation, have been notified to instruct all growers indebted to them that all their wool for the clip year 1934 shall be consigned to commission firms or dealers including the National Wool Marketing Corporation or other wool cooperatives approved by the wool and mohair advisory committee of the Farm Credit Administration.

No Cash Loans

Such borrowers are also to be advised that none of the wool shall be sold at country points. No cash loans or advances shall be made to growers on consigned wool. Wool shall be consigned in the name of the grower and the particular unit of the farm credit administration involved.

The grower shall have the right to select the party to whom his wool or mohair shall be consigned from the approved list of the advisory committee. Such consigned wool or mohair will be sold in consuming markets in an orderly manner under a firm price-selling policy throughout the normal selling season. Houses receiving such wool will be required to dispose of it ratably with other stocks they have on hand, so the farm credit will participate in the consuming market equitably.

No Contracts Made

Wool or mohair consigned to houses under the foregoing provisions shall be sold with a commission charge of 2 cents per pound on original bag wool, and an additional one-half cent per pound for wool that requires grading, with free storage and insurance for four months plus a guarantee of sales accounts. After the four-month period, charges for storage and insurance shall be at the rate of 15 cents per bag per month. Freight and cartage for wool or mohair shall be charged for at actual cost with interest at 5 per cent on the amount involved.

Handling of government-mortgaged wool in this manner last year was credited with strengthening the market and giving the growers a considerably improved price. About 25 per cent of the wool in the Klamath country is in fleeces. There was no verification here Wednesday of reports of large wool contracts either made or pending in this area.

Western States to Demand Share of Navy Building

SAN FRANCISCO, Jan. 25, (UP) — Representatives of six far western states tonight were to be organized to demand that congress and the navy department award to Pacific coast shipyards their fair share in construction under the proposed \$380,000,000 navy expansion program.

Most of the coast shipyards have been idle since 1918. A recent survey by the San Francisco bay industrial committee showed that at least five shipbuilding plants on the Pacific coast are adequately equipped and ready to begin construction immediately. They are the Moore Shipbuilding Co. of Oakland, the General Engineering Co. of Alameda, the Los Angeles Shipbuilding Co. at Los Angeles, and the Todd Shipbuilding Co. and Berg Shipbuilding Co. of Seattle.
