McCulloch and Edward Driscoll. The four attorneys dissolved the firm about three years ago. Horan and McCulloch organized their own law firm shortly after. ## This Woman Lost 64 Pounds of Fat

A Long Island matron writes: "A year ago I weighed 150 pounds. I started to take Kruschen and now I weigh 126 and never felt better in my life—and what's more, I look more like 20 years old than the mother of 2 children, one 19 and the other 18. Lumbermen already have urged submission to President Roosevelt of a supplement to the conservation article of the code to cover specific practices, Silcox said. In a resolution adopted at the recent forest conservation congress in Washington, it was recommended that this supplement "state the general principles of forest practice and sustained yield recommended by the conference as necessary to accomplish the purposes of the article and specifically authorize and require the lumber code authority to issue rules and regulations for the application and enforcement of these principles in the same manner and with the same legal effect as in the case of rules and regulations issued under other articles."

It was recommended also that specific rules and regulations conforming to the approved general principles shall be made legally effective by the lumber code authority by means of individual bulletins issued for each division or subdivision defined in the lumber code.

The "General Principles of Forest Practice"—which lumbermen and foresters call the Conservation Bible—sets the basic requirements under which all forest land to be cut over under lumber code jurisdiction shall be left in favorable condition for regrowth. **They Satisfy**

... people know it!

Same thing with a good cigarette or a good wood-fire. All you need is a light. And all you want is a cigarette that keeps tasting right whether you smoke one or a dozen. That's what people like about Chesterfields. You can count on them. They're milder—and they taste better. In two words, they satisfy. That says it.
