Regulations of Beer Parlors Set by Board

In many instances, cities have already taken the step toward regulation of beer dispensaries, although rural areas have been allowed to operate without restriction.

The regulations announced today also prohibited sale of beer and wine to minors on pain of cancellation of state license and subjecting of the owner of the offending establishment to criminal prosecution with prospect of a severe fine and jail sentence.

Restrictions For Liquor Imports Lifted Tuesday

WASHINGTON, Feb. 21, (U.P.)—All restrictions on importation of American type Rye and Bourbon whiskeys were lifted yesterday until April 1 in order to provide a larger supply both for direct sale and for blending.

The object of lifting the restrictions again, it was explained, is to provide an ample supply of good liquor to defeat bootleggers and curb smuggling over the Mexican border, as well as to reduce the price of bottled liquor to consumers.

A Testimonial from a Spine!

"I used to get out of order and cause a nerve line to become pinched, thus bringing about illness and pain, but since people have learned how to take care of me, I am on the job every minute with an adequate supply of nerve energy necessary to a full life of health and happiness."

Do not expect the hard-working, important spine to keep on the job without a little attention! PINCHED NERVES result from just ordinary activities and can be avoided only by the care a chiropractor is trained to give.

No matter what your trouble is, you can learn important FACTS about it in our Examination with the Radioc Instrument for which there is NO CHARGE!
