Knights Templar to Attend Meet

Representatives of the local commandery of the Knights Templar and the local chapter of Royal Arch Masons will attend the grand sessions for the state to be held at Astoria, beginning next Monday.

George Walton will go as a delegate of the commandery. It is probable that Emmett Magee will also attend the grand commandery session.

C. E. Dennis will attend the grand chapter meetings of the R. A. M.

A device has recently been placed in production in England that renders gear-shifting unnecessary on a motor bus.

Hunting License Purchases Boosted

Indicating that there is more money available for pleasure this year than last, fishing and hunting license receipts at the county clerk's office show a notable gain for the first three months of 1934 over the same period for 1933.

Receipts for January, February and March this year totaled \$244. For the same months of last year, \$109. The monthly table:

	1933	1934
January	\$73	\$124
February	\$29	\$55
March	\$6	\$65

Justice Suspends

Taylor Sentence

Lee L. Taylor, 48, Modoc Point, arrested for assault and battery on his father, Lee Taylor, received the maximum sentence for this offense in Justice W. B. Barnes' court and the sentence was suspended on Taylor's promise he will leave the county.

The arrest was made by state police. The elder Taylor signed the complaint.

No spark plug is immune to oxide eating, and motorists seldom know it is at work until they realize they are buying gasoline oftener than before or until the lag in pick-up and speed becomes so bad that it is noticeable. This loss in gasoline and poor engine performance is unnecessary since the oxide coating can be quickly removed by having the spark plugs cleaned.

Hi, Kids!

Watch your grocer's ads this week for Free Baseball Book.
This is hot stuff. You'll want one.

The Percodripit makes either Drip Coffee or Percolator Coffee

Nonsense? Of course it is! You can't use the same kind of maker for both. Nor should you use the same kind of coffee for both.

In a drip coffee maker, boiling water drips ONLY ONCE through a coffee specially prepared to yield its flavor QUICKLY. In a percolator, water passes many times through a coffee prepared to yield its flavor SLOWLY. The same coffee can be used for both methods, but like a "jack-of-all-trades" it is "master of none"—neither drip nor percolator. In one or the other, little things happen. It's a little weak, or a little strong, or a little cloudy, or it has a little less flavor. It's these little things that make or mar good coffee. Be sure to use the correct coffee for each method.

Your grocer has two Schilling Coffees, identical in flavor, but each is specially prepared for its purpose—each one different in blend, roast and grind.
