The Inside Story From The Capital

By PAUL MALLON

Copyright, 1934, by Paul Mallon

WASHINGTON, April 21—The spring breeze are whispering that Frank Walker is going to leave around July 1.

Walker has been President Roosevelt's inside trouble-shooter. Whenever there was a particularly ticklish job of rosin pulling, coordinating or pacifying to be done, the president has called on his good friend.

The latest job assigned to Walker was coordination of about 115 new federal agencies, organization of a general bureau of new deal information and getting the new home financing campaign started.

Walker's friends say he will have that job in shape in about ten weeks and then will go back to his private business.

REASON  
Walker came down here originally for six weeks. Those six weeks have stretched out into a year. The only way he has been able to handle his business affairs lately is to commute to New York over week-ends.

FRIENDSHIP  
Walker has been one of the main manipulators of the new deal, although always in the background. He is the kind of man every successful president needs at his side, a good friend who stays out of the limelight and is ready to sacrifice himself for the boss.

He was the center of a censorship uproar when he set up the central statistical agency. The uproar died because the board appears to have been fair in its figures. More lately, some of the political critics have taken a few mild shots at him for failure to harmonize the varying new federal agencies. These shots apparently were aimed over Walker's shoulder at the fact that anyone who can get harmony out of that 115 piece band is not a bandmaster, but a Houdini.

His standing is shown by the general circulation given up truthfully to the White House. There is nothing in it, of course, except a rather embarrassing tribute to Walker.

PANTS  
Howe is active around the White House and wants to be more so, in disrespect to his health.

His doctors have found a way of keeping him down. They refuse to give him his trousers every day until after lunch. They were forced to that extreme when he promised to remain at the office only three hours on several occasions and then remained six.

He is a good bit of a philosopher and a humorist, and he has fooled the doctors again by transacting half of his day's work from his bedroom in a lounging robe. Said he to a recent caller:

Miss Perkins has managed to keep it more or less a secret that she has been working for several weeks on a survey of the possibilities of general federal price fixing.

She is the most active member of an inner cabinet committee appointed to recommend a policy on that issue.

She is justified in proceeding under cover, not only because it is a touchy subject, but because nothing probably will ever come of it. The difficulties of federal price-fixing are amply illustrated by what has happened in milk during the past six months.

The differences in production methods, costs and capitalization in every section, and in every firm, make the task so tremendous as to be impossible.

BOOSTING  
Something will come, however, from another secret survey being conducted by the administration.

SIDE GLANCES—by George Clark

tion into obsolescence in the capital goods market.

Who is making the investigation is not definitely known, but it may be Walker's outfit.

The idea is to learn all possible replacements which could be made for capital goods and then to have the government do something about stimulating replacements by encouraging easy financing of them.

It is the thing most needed now. The capital goods market is lagging woefully while consumers goods have been recovering.

NOTES  
Weighty Brookings Institute researchers are responsible for this ditty on the A. A. A.: "Six million pigs went to market; thirty million pigs stayed home; one million pigs made relief meat; five million pigs made foam."

Treasury Secretary Morgenthau took to heart the talk that he might some day leave the treasury to be ambassador to France. Privately and ardently, he informed friends that nothing like that was in the wind now. Some of Morgenthau's associates went so far as to suggest the talk was started by inflationists who wanted to get him out, although that is not correct.

Best newshound in the senate is Senator J. Ham Lewis, who not only knows everything going on in the senate, but everything going on back home in Illinois.

Tom Corcoran, the young Anthony advocate, never wants a hat. His vocabulary resembles that of former Justice Holmes.

Speaking of the backwoods vote-getting ability of Mississippi's Bilbo, a politician recently asserted: "Boy, he shakes the bushes."

Germany's uniforms are in varied hues. Brown is the color of the uniform of the storm troops, black for the protection squadron, Hitler's picked guard; green for the steel helmets, a different shade of green for the police, and field gray for the regular army.

The St. Lawrence is North America's widest river; it is 90 miles wide at its mouth.

Several members of the Klamath county chamber of commerce are planning to attend a picnic celebrating the completion of the Burney-Fall River unit of the Yellowstone cut-off, to be held at Hat creek, Sunday, April 29.

An invitation was extended to the local chamber officers and members through the Shasta Cascade Wonderlands association.

As many as possible are urged to make the trip from here, taking their own picnic luncheons. Hat creek may be reached by the Mall-Canby or the Mall-Bieber highways. Both roads are said to be in good condition.

A number of interesting events are being planned for the picnic celebration.

A rodeo will be given Saturday afternoon, April 28, at McArthur, Calif., and on Sunday there will be all games.

Earl Lee Kelley and Governor James Rolph, Jr. will attend the picnic and Irving Vining will be the official representative from Oregon.

PEDDLERS ARRESTED  
Fined by California Judge For Selling Colored Water.

(Fall River Mirror)  
Two of the gang of peddlers playing their trade in this section were arrested and brought before Judge F. M. Callison in justice court last Saturday night and fined \$50 each for manufacturing and peddling "extracts," which were found to be only colored water. Many local residents, it is said, fell a prey to the tempting bait offered by the peddlers.

Our merchants handle the best goods, backed by a refund of the price paid if goods are not satisfactory. Bargains offered by traveling peddlers generally prove worthless! Trade with merchants you know is the only profitable way, and you are always assured of a square deal.

Outside Publicity

THERE have been frequent indications recently of considerable concern over the type of publicity Klamath county is getting in outside newspapers and over the radio chains.

Political rows, etc., etc., have given this county considerable front page publicity of an undesirable type. It is right—and a wholesome sign—that people interested in the welfare of this community and the Klamath county should become concerned over the matter.

Yet their concern should be based on an understanding as to what is responsible for this situation, if they want to help correct it.

It is foolish to go about yelping at the correspondents of the outside newspapers. What makes news makes news and they are under pay from their newspapers to supply it. If they went about attempting to suppress information that happened to put the community in a bad light, their employers would soon find somebody else to do the job. Obviously, that will not solve the problem.

What happens in the community is going to be reported. If there are political rows, fights, recalls, etc., etc., they are going to make news in outside newspapers. To prevent such news from developing, the incidents themselves must be prevented.

Much of Klamath county's unfavorable publicity comes from incidents growing out of dis-harmony among our own people. Some of these events that happened years ago are still remembered over the entire state. What happened in Jackson county last year is an example of the havoc a split in a community can cause.

Realization that community dis-harmony can be a source of a lot of unwanted publicity, would seem to provide a basis to work from for elimination of at least a part of such publicity.

The people who live in a community largely determine the kind of news it gets in outside newspapers.

LEGION AUXILIARY PLANS BIG DANCE

The convention committee of the American Legion Auxiliary announces a benefit dance to be held at the exhibit building on Saturday, May 5.

Proceeds from this event will be used to purchase equipment and uniforms for the auxiliary drum corps and drill team which will appear at the state Legion convention to be held at Astoria on August 23, 24 and 25.

The women's drum corps and drill team will perform the same intricate drill measures and play the same music as the Legion drum corps.

Members of the organization are: Ruby Winetrot, Helen Moore, Betty George, Mabel Fowler, Fay Sparks, Dorothy Tomplar, Peggy Browning, Martha McCollum, Eleanor Cook, Ed Elder, Alice Boden, Evelyn Weber, Dorothy Davis, Ruby Wisecarver and Ethel Fenwick.

The idea of the women's drum and bugle corps is a new one for working up competitions each year at the state convention, and it is hoped that the local organization will stimulate other auxiliaries to form such groups. The Klamath drill team will issue a challenge to the entire state for the 1935 convention.

A number of interesting attractions are being planned for the benefit dance to be held May 5, and the public is cordially invited for an evening's entertainment.
