MEMBERS of the United States board of engineers are told at Medford that the industrial future of Southern Oregon and Northern California depends upon establishment at Crescent City of a deep-water harbor.

WHY? Because Southern Oregon and Northern California suffer from a hump-backed freight rate structure that permits the railroads to charge more for hauling a carload of freight from San Francisco to Medford or Klamath Falls or Roseburg than for hauling the same carload of freight from San Francisco to Portland.

THE purpose of a deep-water harbor at Crescent City is to remove the handicap, permitting the landing of freight at low water rates at Crescent City and its distribution into interior Southern Oregon and Northern California by truck.

CONGRESS first proposes to spend \$450,000,000 a year on highways. Then an amendment to the appropriation measure reduces the amount to be spent annually to \$150,000,000.

VOTING PRECINCT WINNERS RELEASED

Democrats, Republicans Name Committeemen At Election

Republicans in 45 of Klamath county's 58 precincts named central committeemen at the primary election, according to the final compilation of election returns at the county clerk's office. Democrats in 30 of the precincts elected committeemen.

It is expected that within a few weeks the central committees of both parties will meet. Write-ins Numerous. There were a great many write-ins for central committeemen in both parties, delaying the final count and causing considerable confusion. Neither the party of the individual nor his precinct residence was apparently considered in connection with several of the write-ins.

Several votes are shown in the results. It is expected returns will be drawn in such instances to determine which will serve on the committees. The committees of the two parties follow, the vote of the winner being given in each instance:

- Republican. No. 1—Clay P. Mason, 1. No. 2—William Kuykendall, 45. No. 3—Embert Fossum, 10. No. 4—A. W. Schaupp, 6. No. 5—D. R. Vandenberg, 60. (Continued on Page Three)

SPEED TRAIN STREAKS OVER MIDDLE WEST

New Burlington's Zephyr Nears Finish of Non-Stop Run

RAILROAD TRAVEL RECORDS BROKEN

Swift Mode of Transportation Proven by Modern Train

ABOARD THE ZEPHYR CROSSING IOWA, May 26. (AP)—With more than half its non-stop trip from Denver to Chicago completed, the Zephyr, New Burlington speed train, slowed its pace as it entered Iowa shortly after one p. m. (CST) today.

At Ashland, Neb., the half-way mark in the race against time road officials aboard disclosed that the train had traveled 507 miles in six hours and 26 seconds for an average of 79.7 miles an hour. They explained that, with the fastest part run, the progress through Iowa and Illinois would be slower because of the increasing number of towns.

The new speedwagon of the rails streaked through here at 1:10 p. m. (CST) with an elapsed distance of 542.26 miles after crossing the Missouri river at Plattsmouth, Neb., a few minutes before.

The train, carrying road officials and newspapermen, left Denver at 5:04 a. m. (MST).

HALF-WAY PASSED WOODBURN, Ia., May 26. (AP)—The Zephyr, Burlington speed train, completed 667 miles of its 1,017 mile non-stop trip from Denver to Chicago when it passed through here at 2:42 p. m. (CST).

THOUSANDS LINE TRACKS ABOARD ZEPHYR CROSSING NEBRASKA, May 26. (AP)—Roaring down out of the mountains and streaking like a silver arrow across the plains of eastern Colorado and Nebraska, the Burlington's Zephyr today seized the world's non-stop train record. (Continued on Page Three)

Mild Winter Brings Menace

DANGEROUS SPIDERS, TICKS AND SNAKES REPORTED ABUNDANT

The mild winter may have been easy on the woodpile, but it is given the blame for an infestation of unwelcome insects in this area, including the poisonous "black widow" spider and wood ticks. It may have something to do with the large number of rattlesnakes reported to be abroad earlier this year than usual.

Numerous Reports Heard. County Agent C. A. Henderson said Saturday he has had numerous reports of "black widows" being found, and one report of a bite. The spiders usually make their homes under and between rocks, and their presence is suspected in many rock gardens. F. L. Chitwood, in a letter to the Herald and News, relates that he has watched for black widows and has found them infesting a much wider area than would be expected in one season.

The nests, according to Chitwood, are hung on a crude web between the cracks in the rocks. The spider is a shiny black insect, sometimes marked with red on the underside, and with feet outspread would cover about a half-dollar. Recently, one was exhibited in K. Sugarman's window. Chitwood offered the suggestion (Continued on Page Three)

G. O. P. OF OREGON HOLD HUGE RALLY

New Deal Methods Come In For Criticism At Portland

PORTLAND, May 26. (AP)—More than 700 persons attending the largest political party gathering in Oregon in recent years heard the plea here last night for formation of a militant organization of Oregon republicans dedicated to preservation of representative constitutional government.

Sprague Chief Speaker Charles A. Sprague, editor of the Oregon Statesman at Salem, declared, as the principal speaker, "The immediate job of the republican party is the guardianship of ordered liberty and representative government under constitutional safeguards."

Mentioning that he did not propose "to indulge in criticism of the NRA with its codes, its implied boycotts, its threats of economic death, nor in condemnation of the AAA with its almost conscienceless destruction of food and cotton when thousands were on the verge of starvation or nakedness," Sprague declared that, after all, the "new deal" is in actuality, "an old deal."

The new deal, he continued, is in effect "a reversion to economic systems long since discredited and harking back to the mercantile of the middle ages, to the mercantilism of the 17th century with its conceptions of economic insularity, its closed colonial system." (Continued on Page Three)

NEVADA COMPANY LOW IN BIDDING

PORTLAND, May 26. (AP)—Nearly nine million dollars will be spent, and more than 1,000 men employed in construction of the huge main spillway dam of the \$31,000,000 Bonneville power-navigation project.

The Columbia Construction Co. of Reno, Nev., submitted the low proposal for the spillway construction when bids were opened by the United States district engineer here late Friday.

SAN FRANCISCO, May 26. (AP)—Reports from 115 Oregon firms indicate, the federal reserve bank here said today, "that industrial employment and payrolls in that state increased by about the customary amount during April."

PORTLANDERS ORDER MAYOR INTO ACTION

Open Port In '24 Hours Sought by Chamber of Commerce

LOSSES IN TRADE BRING PROTESTS

Dynamite Plot Believed Discovered on Rose City Waterfront

PORTLAND, Ore., May 26 (AP)—The Portland chamber of commerce today demanded of Mayor Joseph K. Carson that the Port of Portland be opened "within 24 hours."

Costly Trade Lost The chamber directors addressed a letter to the mayor demanding that "such steps be taken as may be necessary in order to establish law and order on the waterfront" so that "regular business of the port may be resumed." Longshoremen have been on strike here and at other coast ports for 18 days.

Twenty-four hours' grace was given, the letter said, "to determine progress of the federal mediation board at San Francisco."

Unofficial estimates by independent responsible sources place the loss resulting from the waterfront strike in Oregon at more than \$7,700,000.

DYNAMITE PLOT FOUND

PORTLAND, May 26 (AP)—John Bltte, 29, an unemployed electrician, was held in the city jail without bond today while police detectives made a painstaking examination of an automobile load of dynamite and a homemade automatic time switch, found last night near the waterfront.

The automobile was owned by Bltte. He said it was stolen from him by two men he did not know. The car, when found by police after Bltte had reported it stolen, contained 304 sticks of dynamite strapped with many feet of wire, and the home-made switch.

Bltte denied ownership of any of the material found in the machine. The time-switch consisted of a tin can in which a candle had been placed. The candle was designed to burn through a cord which, when severed, would permit rubber bands (Continued on Page Three)

WILL ROGERS SAYS:

BEVERLY HILLS, Cal., May 26.—The government is trying to fix silver, gold, Wall Street, tariffs, how much to plant, and a thousand other problems, yet the greatest and most urgent need in our land now is the settlement of strikes. It's so far above the needs of any other legislation that there is no comparison.

Can't the government make arbitration compulsory? Everybody knows that there is wrongs, everybody knows there are strikes with just cause, and some that are not, but with the labor union, one man, the man that hires him, one man, and the government, one man, it looks like the side that wouldn't agree to that there is something wrong with.

Let everybody stay on the job during arbitration. If they get the raise of wages, it starts back from the day the complaint was made. If that was fixed, all these other things wouldn't need fixing. Yours, Will Rogers
