

STOCK, GRAIN LOSSES HEAVY IN HEAT WAVE

(Continued from Page One)

arees doomed the cattle. The government announced they would be slaughtered to relieve farmers in Minnesota, the Dakota and Texas, where feed shortages prevail.

Huge Costs Listed

George E. Farrell of the agricultural adjustment administration estimated the daily wheat abandonment due to drought at one million bushels—roughly \$850,000. He noted that the drought conditions are especially

acute in northern states. Nevertheless, farmers in Kansas, which grows a fourth or more of the wheat produced in the United States, looked with increasing concern at their blown-out and deadened fields. In many parts no rain had fallen for more than a month. Walter McLaughlin, director of the Illinois department of agriculture, foresaw the danger of milk firmness in many cities of that state unless dairy farmers receive help against the worst drought in Illinois history.

Hoppers Swarm Region
Augmenting the drought menace in the northern states were hordes of grasshoppers which have begun to feed on crops in Minnesota, the Dakotas, Montana, Wisconsin and Michigan.

Memorial Day marked a veritable tide of record-smashing temperatures, with Sioux City, Iowa, and Huron, S. D., the nation's hot beds, each with 106 degrees. Temperatures above 100 were reported from cities in Iowa, Missouri, Kansas, Nebraska and Texas.

A typical report came from Pittsburg, Kas., where the Crawford county agent, S. U. Case, said that unless rain falls within a few days most crop conditions in southeastern Kansas will be critical.

Other high marks reported included: Omaha, Neb.; Pittsburg, Kas.; and St. Joseph, Mo., 104; Brookfield, Mo.; Kansas City, Topoka and Manhattan, Kas., 103; Needlesha, Kas., Atchison, Kas., and Bismarck, N. D., 102; Bartlesville, Okla., and Wichita, Kas., 101.

SHOE WEEK ?

COMING Tomorrow & Sat.

A special representative of the Cromwell Tailoring Co. will be at this store on the above dates showing more than 500 new fabrics for made to measure suits. Gents, don't miss seeing this unusual display—it's a real opportunity to get a suit made you'll like—priced at \$29.50 to \$55.

the earth-fill dam at the park, construction of a concrete wall around the intake, widen the road and landscape the grounds around the reservoir, completion of the irrigation sprinkler system, seeding of the lawn areas, painting the building and fences, grading of old roads in the park, building rock foundations for camp fire places.

This would involve a total cost of \$6800, of which \$1400 would be a local contribution.

STRANGE SUICIDE PLOT UNCOVERED

ALAMEDA, Calif., May 31. (AP)—Abandoning his weird dynamite suicide scheme, Frank Bennett emerged from his automobile shortly after noon today and immediately was seized by waiting police.

Officers pincioned the man's arms, placed him in a police automobile, and rushed him to jail. A careful watch meanwhile was kept over Bennett's automobile, left guarded on the marshlands, to prevent a surging crowd from approaching the machine.

The automobile contained 48 sticks of dynamite and five quarts of nitroglycerine, and officers were fearful that any jar would set off a terrific blast.

Eyes Punched Out of India Ex-Chief

SIMLA, India, May 31. (AP)—The eyes Lung Shar, former commander of the late Dalai Lama's Tibetan army, have been gouged out because he made a bid for power in the internal political struggle after the Dalai Lama's death in December.

LIFE LONG "FRIEND" Keeps Them Fit at 70

This safe, all-vegetable laxative—**MR.**—has been as dependable as a family doctor during their trying "after forty" years. **MR.** keeps them regular—year after year—faithfully—with never any need to increase the dose. No wonder their "evening of life" is as free from complaints as the morning. Millions of people welcome the aid of this reliable corrective. For Nature's Remedy strengthens and regulates the entire eliminative tract, safely carries away the poisons that bring on headaches, colds, biliousness, constipation, etc. Get a 25c box. All drug stores.

TO-NIGHT
TUMS® Quick relief for acid indigestion, heartburn. Only 10c.

STATE, CITY CHIEFS ASKED TO JOIN MOVE

and John C. Bjorklund, Pacific district secretary.

PORTLAND, Ore., May 31. (AP)—A complete blockade of the port, caused by the longshoremen's strike, reduced Portland's foreign exports in May to about one-fourth of April's volume. The strike has been in force three weeks.

In May exports abroad amounted to 32,370 tons valued at \$656,734. In April the volume was 123,534 tons valued at \$2,483,933.

ANNUAL SWIM WEEK OPENS ON MONDAY

It's never too late to learn to swim, according to local officials of the American Red Cross, who have announced the annual swim week to begin in Klamath Falls on Monday, June 4, at Butler's natatorium on Spring street.

Classes for persons from 7 to 70 years of age will be organized, and free instruction both for advanced students and beginners will be given.

Students are urged to enroll at the natatorium before Monday, in order that classes may be organized and preliminary details arranged before the beginning of "swim week."

Miss Ella Redkey will be in charge of swimming instruction.

This Truck can "take it" because it's All Truck!

THE new Ford V-8 can "take it" with a heavy load in any weather because every part is a new, heavy-duty truck part. In designing this unit no compromise with passenger car manufacture has been allowed at any point in the chassis or body.

The new Ford truck has a special, heavy-duty, 8-cylinder truck engine. It develops 80 full horse-power. Dual down-draft carburetion has

added to the V-type engine's inherent economy and power. New floating copper-lead connecting-rod bearings prevent bearing failure. These brand-new inserts do not pound out. The rear axle is full-floating. The driving piston is straddle-mounted.

See the new Ford V-8 now on display at your nearest Ford dealer's. Body types available in two wheelbases to meet every hauling need.

For 40 Years Leaders In Quality Tire Building

Do You Remember That KELLY-SPRINGFIELD

Was first in 1894 to give you a successful rubber buggy tire—
Was first in 1906 to give you a full molded automobile tire—
Was first in 1907 to give you a flat tread type automobile tire—
Was first in 1912 to give you an individual non-skid tire and a 7500 mile guarantee—
Was first in 1916 to give you a caterpillar type solid tire—
Was first in 1919 to give you an effective non-skid tread cord tire—
Was first in 1924 to give you a modernized full balloon tire; and that during a great portion of this time the public paid more for these extra service tires?

Again in 1933—Kelly-Springfield was first to give you the

Fatigue Proof

type tire—The tire so necessary for today's high speed automobiles—AT NO EXTRA COST.

It takes months to develop a really new tire—So with laboratory research and mountain testing, on its own fleet of cars and trucks, Kelly was ready with this tire as soon as the cars were here to use it. This tire was strengthened at every point of strain—The tread was made 33% deeper and 20% wider, giving this tire an average of over 95% more effective non-skid—The tire carcass was made from a tougher, kinkier cotton fiber and they called it "Corkscrew" Cotton—and the piles of cord were insulated with rubber in such a way as to increase resistance to heat and carcass separation by over 40%. And a new tread compound was developed that gave 40% more non-skid mileage. This was called Vitalized Rubber. A tire built to stand punishment—And after 16 months of usage by an exacting public, it grows in favor—

FABLES OF 1934!

Once upon a time there was a little red hen. This little hen grew up in a yard with other little hens but somehow she grew larger than some of the other little hens and it made her feel very proud.

She developed and laid eggs. Just like the other little hens but there was nothing exciting about all this, until one day she laid an egg a little different, in color and size and shape, than her other little eggs and it made her very happy.

She admired her work and let out a cackle of joy . . . excitement . . . and she was very happy and excited, and the more she cackled the more excited she got and the more she admired her egg. "Certainly," said she, "it is the prettiest little egg that has ever been laid," and she cackled her excitement to the world. Thought she, "If I can just cackle long enough and loud enough, who knows, the world may think this is the only little egg that has ever been laid." And she was very proud and excited.

A few days later, said she "Gee! Three little eggs all alike and all so pretty. My, Oh My, I want all the world to know about them, I'm so excited." And then she paled in horror . . . "Just think, if other little hens should try to copy my egg! Oh, it just can't be, I won't let them. I'll warn the world," and she cackled: "Beware! Beware! Other little hens may try to copy my egg" . . . and she was so excited.

And all the time she forgot that maybe the other little hens had laid their pretty little eggs a year ago, and that they were just as proud of their little egg as she was of her own . . . she was so excited.

The clean Center Leaves are the mildest leaves They Taste Better!

SMOKERS are talking about the whole goodness of the fine tobaccos used in Lucky Strike. The reason is, we use only the clean center leaves—these are the mildest leaves—they cost more—they taste better. And their goodness is increased because

"It's toasted" for throat protection. Every Lucky Strike reaches you round, firm, fully packed . . . that's why you'll find that Luckies "keep in condition"—do not dry out. Naturally, you'll enjoy Luckies—for Luckies are all-ways kind to your throat.
