

KLAMATH MILK CODE PLACED IN OPERATION

A new milk code recently drawn by the state milk control board went into effect in Klamath Falls at midnight last night carrying with it several changes in the price of the product at local stands.

The minimum price to be paid producers shall be \$1.70 per hundred-weight, for 4 per cent milk, F. O. B. market. The price is to include all milk and cream with no surplus charged back to the producers. Producers who were not selling milk December 15, 1935, when the original act became effective, and have since started selling, will be compelled to stop selling whole milk, according to regulations of the order.

Minimum Prices Set

Every day delivery of four quarts will sell at 36 cents and each additional quart at 9 cents. Six quarts or more will be sold at the wholesale price, 8 cents.

At milk depots gallon lots will be sold for 35 cents. Before this morning the price varied in the city and in the country. In the former it sold for 30 cents and in the latter for 28 cents.

Minimum wholesale and minimum retail prices in varied lots will be sold according to the following scale:

Milk	Wholesale	Retail
Quarts	8c	10c
Pints	5c	8c
Half pints	3c	—
Gallon (wholesale trade only)	35c	—
(one container)	—	—
Buttermilk	—	—
Quarts	8c	10c
Gallons	28c	35c
(30c cash over counter)	—	—
Skim Milk	—	—
Gallons	8c	10c
Cream (up to 35% fat)	—	—
Half pints	13c	15c
Pints	23c	25c
Quarts	45c	50c
Gallons	\$1.75	—

All the above prices are based on 4% milk. For each point buttermilk in milk raised above 4% buttermilk the price shall be increased 1c per quart, 5c per pint or half pint. All milk from legal to 4.2% will take price of 4%; over 4.2% and not over 5% takes price of 5% milk. Average of three tests over 30-day period.

The term "milk" means fluid milk and the term "cream" means sweet cream, both sold for human consumption in fluid form. All cream over 35% shall raise at rate of 6c per point.

No cash discounts, trading stamps, rebates, advertising allowances, unusual extensions of credit, gratuities or free service of any nature shall in any way enter into the sale or purchase of the milk or cream in Klamath county, Oregon, under this act.

At all retail shops a charge of 5c shall be made for all bottles not returned.

The use of any type or design of milk or cream bottle cap other than the standard flat disc cap now in general use shall require

the additional minimum charge of 1c per bottle.

Under the milk control law every milk dealer is required to operate under a license granted by the board. The term "milk dealer" means any person who purchases or handles milk within the state or sells milk within the state for sale in this state or sells milk within the state except when consumed on the premises where sold. Violations of the law shall be punished by a fine of not less than \$25 nor more than \$1000 or imprisonment for not less than 30 days or more than 90 days, or both.

"Milk treated mechanically or by any process other than pasteurization shall be sold on a minimum basis of 1c per quart, pint or half pint above the regular price established in this order.

"Distributors' sale of bottled milk and cream to peddlers shall be 12% below wholesale prices, and accounts settled in full every 30-day period. Peddlers shall not sell at wholesale or retail below prices set in this order. No peddler shall change the source of his supply without the written permission of the milk control board."

The above orders and instructions were signed by E. G. Harlan, O. M. Plummer and Burge W. Mason, members of the Oregon milk control board.

PIONEER RESIDENT DIES IN PORTLAND

Word has been received by relatives in this city of the death of Mrs. C. E. Shaw of Portland. Mrs. Shaw will be remembered by older residents here as Mary McClure.

She was born at Champeau, Ore., in 1855 and lived in Oregon most of her life. She was an early settler in Klamath county, coming here in 1887 with her brother, the late James McClure. They settled on a homestead south of town on the Merrill road.

Mrs. Shaw is survived by a son, John Shaw of Woodburn and a daughter, Mrs. Sturgeon of Portland.

South Wales is planning a \$35,000,000 plant to produce oil and smokeless fuel from coal; it is to employ 8000 men.

Small three-wheeled automobiles are being used by squads of London police to speed through dense traffic.
