**Pursang Ideal Tonic for Skinny, Cranky Children**  
Marvelous New Tonic Revitalizes the Blood and Energizes "Run Down" Systems

If your children are skinny and underweight, cranky and whiny, maybe it is because they are anemic and run down. Growing up takes terrific energy. The wear and tear of the years weakens resistance. The blood gets thin. It no longer performs its proper functions. Toxins in it pour into the system. Is it any wonder that nine people out of ten feel "half sick" all the time?

If your children look run down or you yourself feel below par, why not try the Pursang treatment for awhile? Pursang every day before or after meals.

You mustn't expect instant results with Pursang, but it is the experience of many people that before the first bottle is exhausted they feel a material improvement in health. The eyes are clearer, there is a new sense of energy. None of that "all in," "let down" feeling by three o'clock in the afternoon. Pursang stimulates the body, builds rich, red, healthy blood corpuscles, helps to maintain the essential balance of white and red corpuscles and tones up the entire system.
