

SQUIRREL POISON CAMPAIGN PUSHED

Landowners in Klamath county are urged to rush squirrel poisoning in the next week or 10 days as the season is drawing to a close and the rodents will soon begin to refuse grain.

Squirrels go into hibernation very early, about July 1st, except in mountain districts, according to County Agent C. A. Henderson.

Just prior to hibernation they eat only succulent greens and drink water, and refuse all hard food so that poisoning is impossible.

Poisoned grain is available at all county stores and at the county agent's office. Approximately 16,000 pounds have already been mixed and sold and more is available for the wind-up of the poison season.

THE ONLY SMALL THING ABOUT A BUICK

\$1029 delivered here

Look high and look low throughout this smart and spirited Buick SPECIAL, and you'll find only one thing about it that's anything but big.

It's big in its inches, length and breadth—big in the ample, stretch-out space it supplies to driver and passengers alike.

It's big in its power—it hasn't found a hill it couldn't easily master, or a driver it couldn't thrill by the fervor of its quick response, the smoothness of its stride.

It's big in the measure of its quality, seen and unseen—every nut and bolt and strut and part is eloquent testimony to Buick's insistence that the best alone will do.

It's big in the pleasure it can bring you—pleasure that comes from handling a sparkling and superior performer—pleasure that's yours from owning a car so obviously better than mere transportation requires.

It's big in the satisfactions it yields—from the smartness of its valid streamline style, from the surety of its comfort, and your knowledge that the family couldn't be safer in a car.

It's big in every way, until you reach for the tag that names the price—then you find that it's only a short step up from the lowest-priced fiend to the Buick of your dreams. \$1029 and up, here, the price tag on the Buick Special, Series 40, reads, and the terms are within anyone's reach.

Company Coming...

but not a dinner-worry for the calm hostess!

This isn't a fairy-tale, though its beginning sounds like one. Any woman who lives the modern way . . . making use of appliances that mean ease and speed . . . may be a gracious hostess whom everyone likes to know. Automatic ranges eliminate the disagreeable side of cooking. They leave a woman free to arrange her home for company, to set her table invitingly, and then . . . to refresh herself by nap or beauty treatment, and dress without haste. She relies on the marvelous time and oven control features of the new ranges. She prepares the meal, but the cooking is handled by automatic devices. Present utilities rates are so low that the operating of an automatic range is a real economy.

The California Oregon Power Company

Oven Control . . . the almost human regulator which governs heat of your oven so that whatever is within cooks evenly at the proper temperature.

Time Control . . . the contrivance which a housewife sets to cook a meal in her absence. When the hour arrives the timer starts the operation.

Put your roast in the oven, set oven and time controls, and your meat will be perfectly done.

Put your vegetables in with the roast or separately and find them ready when you are ready.

Make your pie, slide it into the oven, leave it so long as your twin controls are set.
