Corn Hits 16-Year High

DROP OCCURS IN FINAL TRADING

CHICAGO, Aug. 19 (AP)—Corn futures dropped late today after new soaring of 3¢ cents a bushel to highest points reached in sixteen years.

The acme in the corn market for at least the time being was reached by a purchase of No. 2 white at $1.37 a bushel, 18 cents over the September price. Big profit-taking sales of futures, together with estimates that vessel space for 10,000,000 bushels of Argentine corn had been chartered in the last two weeks to move north did much to cause the corn market to react at the last to around yesterday's finish.

Corn closed nervous, ¾ lower to ¼ higher compared with yesterday's final transactions, Sept. $1.16¼-$1.16⅞, Dec. $1.00¼ to $1.00⅞, wheat ¾ off to ⅛ up, Sept. $1.14⅞-1.14¾, Dec. $1.13 to $1.13¼, oats ¼-½ advanced, and provisions varying from 2 cents decline to 5 cents gain.

PORTLAND, Aug. 19 (AP)—Wheat futures went to a new high for the season during the session of the Portland market today with final on September and December up ½c and May up 1c bushel. There was no trading. One feature was the fact that September and December quotations continued on the same level while there was only ½c more offered for the May.

Cash wheat was unchanged locally but Montana was off 1c while oats gained 50c for white and $1 ton for gray and barley had a sheer rise of $1.50. Millrun advanced $1 ton.

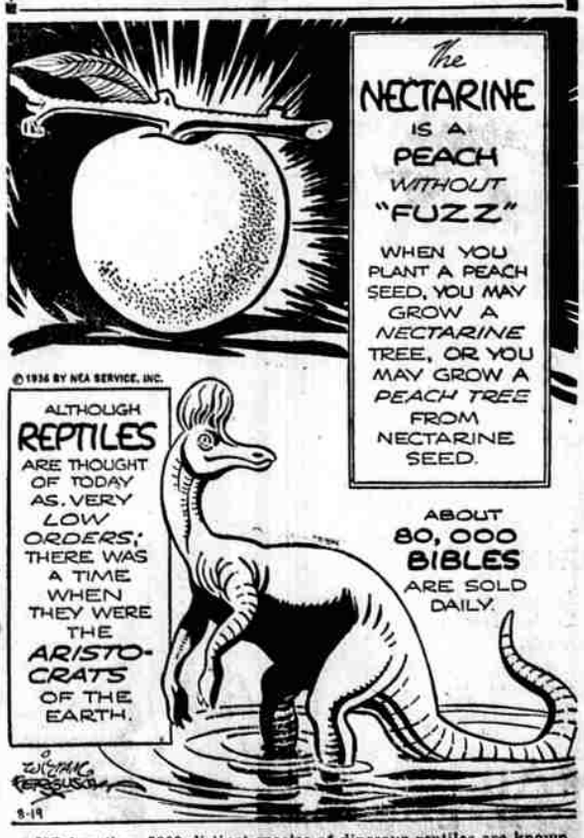
THIS CURIOUS WORLD By William Ferguson



NO less than 5000 distinct species of dinosaur reptiles are known to have lived back in the Mesozoic age. They ranged in size from small rabbit-sized creatures to the huge Brachiosaurus, 80 feet in length. They began in the Triassic period, and became extinct at the close of the Cretaceous period. Today, they have no living near relatives.
