

Uniformly Good Products At All Times

ARE AN OUTSTANDING CHARACTERISTIC OF

MARTIN BROS. ROLLER MILLS

We attribute this in a large measure to our method of using the best of wheat and products locally grown. The most thoroughly developed system of manufacturing in the largest roller mills between Portland and Sacramento.

The putting together of the elements behind FLOUR production, the designing and the building of an efficient roller mill are no simple matters quickly conceived and accomplished in a few months. The utilization of natural resources of timber and power, the construction of plant and facilities, the creation of an operating staff, the bringing together of skilled personnel—these take time and money.

The firm, established in 1884, by Thomas Martin, father of the present brothers who manage and operate the large mill, founded his first flour mill on Link river. The sons of Thomas Martin built a mill on Sixth at Oak in this city in 1908, moving to their present location after railroad entered Klamath Falls. The present plant was constructed in 1918 starting operations in 1919.

The firm established by Thomas Martin in 1884 now Southern Oregon's Largest Flour Mill and Grain Dealers.

SUCH FINE FLOURS AS ANCHOR BRAND AND CRATER LAKE have been approved by thousands of housewives. Due to their fine texture and wholesome goodness they produce the perfect loaf. There's no substitute for good flour. Tests have proven it simply does not pay to buy an inferior brand.

A HOME INDUSTRY which creates a market for local growers, MARTIN BROS.' roller mill also maintains large warehouses at Tulelake.

IT'S TASTE

That makes a flour popular with the lovers of good bread and other baked products.

Of course the quality of the wheat used means a lot too, but only because it determines the fine taste of a well-baked, delicious product such as may be produced from CRATER LAKE or ANCHOR brand flours.

If you haven't tried a Martin Bros.' product and you really like fine bakery goods, order a sack from your grocer now and learn how really good bread and baked products can be.
