

ENROLLMENT IN LOCAL SCHOOLS MAY PASS 8500

More than 8500 Klamath county boys and girls will start the national trek back to school within 12 days. They will join millions of students throughout the country as they advance another year on the path of learning.

Klamath Falls city schools, including Sacred Heart academy, will open Tuesday, September 6. The 1937-38 enrollment totaled 3418 students and the number of teachers on the city school faculty was 84, it was learned from J. Percy Wells, superintendent of city schools.

Quite a bit of repair work was done on the schools of the city including Fremont, Fairview, Joseph Conger, Roosevelt, Mills, Pelican and Riverside. Workmen were busy cleaning floors and caulked walls. A complete flush coating was given the Mills school roof and the concrete court in the rear of the Fremont school was repaired for the students.

"We do not expect an increase in enrollment this year," Wells stated. "Throughout the country, especially in the larger centers, there is a trend toward the suburban districts, and the families that have the largest number of children are moving to tracts and acreages outside the city limits."

Teachers of the Klamath county school system, of which there are more than 165, will have a meeting Tuesday, September 6, and students will enter the 35 elementary schools and the nine high schools Wednesday morning, September 7. Enrollment in the elementary schools last year totaled 3974 and in the high schools 684, making a total of 4658.

There will be a great increase in Klamath county school enrollment, it is anticipated, especially in the Crescent school area where 71 grade school children and 35 high school students are expected to make their first enrollment in the school system. This is due to the construction of the mill at Crescent by the Gilchrist Timber company, it was stated.

Two large rooms were added to the Crescent school this summer in order to care for the increase in enrollment this fall, and a new school at Crescent is included in the proposed \$272,727 school construction program for which a \$150,000 bond election will be held September 14, according to Fred Peterson, Klamath county school superintendent.

Klamath Union high school students, of which there will probably be more than last year's enrollment of 1028, will gather Wednesday, September 7, for registration, and teachers, 40 in all, will have a meeting on the Tuesday preceding the opening day of school. This is the tentative program, it is understood. There is an increase of five faculty members, at Klamath high school it was reported.

At Sacred Heart academy 250 students are expected to enroll and a faculty of 15 teachers will open school Tuesday, September 6. The teachers are again stressing the art and music departments, and it is understood that the majority of academy students are enrolled in one of the two courses.

City school children are provided with text books, as are the county school children. They do buy, however, such supplies as tablets, pencils, composition books, crayons and a few work books. The county high school students are also provided with books, which are properties of the high schools.

Students of Sacred Heart academy and also Klamath Union high school purchase their own text books and supplies, and all ma-

terials needed for the school year, it is understood.

Final details are being worked out by heads of the various school departments, and teachers are contracted for the coming year.

Cook with COLD

Your electric refrigerator does more than keep things cold. It does cold cooking, too. In it you can make delicious frozen and jellied salads, and wonderful home made ice cream and water ices. You can regulate it for quick freezing or slow, so that it will fit in with your meal-getting schedule nicely. Cold cooking is very inexpensive, too. The refrigerator does it at the same time that it keeps all perishable foods safely cool, and you know it does that for only a few pennies a day. Find out how easily you can have one.

Your Electric Refrigerator

1. Is fully automatic, and needs no attention. Just plug it in.
2. Maintains a temperature of 50° or below in the storage compartments.
3. Makes delicious frozen desserts and salads in the freezing trays.
4. Supplies plenty of pure, sparkling ice cubes for cold beverages.
