SOROPTIMISTS PLAN TO SEND DELEGATES TO SALT LAKE CITY

Plans to send delegates to the bi-annual convention at Salt Lake City were made by the Klamath Falls Soroptimist club at a business meeting and luncheon held Thursday noon, February 8, at the Willard hotel.

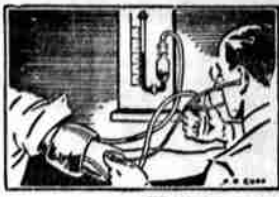

The constitution of the American Federation of Soroptimist clubs provides that the president be a delegate and an additional delegate shall be elected by the club. Following this provision, Mrs. Effie Garcelon was elected a delegate and Mrs. Beniah Ray, alternate. Mrs. Ida Odell is president of the local club.

It was unanimously voted to forego the meeting scheduled for February 29 and in its stead members will attend the inter-club dinner to be held at the Willard hotel March 1, under the auspices of the 20-30 club.

Members are looking forward to the meeting on February 15 when Mrs. Lucille O'Neill will give a book review, and much interest is evidenced for the meeting of February 22 under the sponsorship of Mrs. Kathleen Thompson when an "Information Please" program will give everyone an opportunity to exhibit knowledge of general information.

CARD OF THANKS

We wish to thank our many dear friends for their kindness and flowers in our recent bereavement in the loss of our baby boy, Donald. Mr. and Mrs. Walter Knutson and family.

WHY TAKE BLOOD PRESSURE?

There is no diagnostic procedure which gives the doctor more information about his middle-aged patient than an accurate blood pressure determination.

The trained physician can learn the condition of the arteries, heart action, and detect symptoms of many diseases, only successfully treated in their early stages, such as Bright's disease, toxic goiter, a tendency toward apoplexy.

Low blood pressure is not particularly frequent or serious, and is an indication of some debilitating condition. It is also true of high blood pressure that it is a symptom - not a disease. The way to cure high blood pressure is to prevent it by regular general examinations, so that any beginning increase may be detected in time to do something about it.

U.S. ANTARCTIC EXPEDITION OFF FOR YEAR'S SURVEY

SLED DOGS...YEAR'S SUPPLY OF SLOW-BURNING CAMEL CIGARETTES ACCOMPANY ADMIRAL BYRD TO ANTARCTIC

"MORE PLEASURE PER PUFF... MORE PUFFS PER PACK"...

That's how these three members of the U. S. Antarctic expedition tell of the advantages of their favorite cigarette...slow-burning Camels. Richard Moulton, senior dog-driver (center), sums up when he says: "Slow burning is my measure of a milder, cooler, more flavorful smoke. I'd sledge a mile for a Camel." Nothing destroys a cigarette's delicate elements of flavor and fragrance like the excess heat of too-fast burning. Cigarettes that burn fast - cool! Camels are slower-burning...milder, mellower, and - naturally - cooler! Try Camels. Find out for yourself how slow-burning Camels give you more pleasure per puff...and more puffs per pack - more actual smoking (see right).

CAMELS FOR MILDNESS, COOLNESS, AND FLAVOR - SLOW-BURNING COSTLIER TOBACCOS

OFF TO VOLUNTARY EXILES: If you were leaving today to live for a whole year on the barren ice of the Antarctic, and if right now you had to choose the one and only brand of cigarette you would smoke through those months - you'd make sure you picked the right brand. The men on the Antarctic expedition were in a situation like that. The picture above shows what happened: The expedition took Camels! Rear Admiral Richard E. Byrd, commanding, explained: "Slow-burning Camels are a great favorite with us. You can be sure we have plenty." You, yourself, may never go near the South Pole, but the right cigarette is important to you, too. Camels are made from finer, more expensive tobaccos. They give you extra mildness, extra coolness, and extra flavor - plus extra smoking in every pack. (See below.)

In recent laboratory tests, CAMELS burned 25% slower than the average of the 15 other of the largest-selling brands tested - slower than any of them. That means, on the average, a smoking plus equal to
