

MODERN GIRL ALL 'VOGUE OUTSIDE, VAGUE INSIDE'

KALAMAZOO, Mich., Feb. 21 (AP) — The modern girl was pictured here Monday night at a conference on family relations as "all vogue on the outside and

all vague on the inside."

The speaker was Dr. Paul Popenoe, sociologist and biologist who founded the Los Angeles Institute of Family Relations.

"She is pretty as a picture," said Dr. Popenoe in continuing his description of the 1940 girl,

"but somewhat overexposed and undeveloped."

The central theme of the conference is "The Family Functioning in the Modern World." It is not functioning very well, Dr. Popenoe contended.

"The family today," he said, "is facing extinction chiefly be-

cause of the universal acceptance of several fallacies associated with affectional function. The modern romantic concept of love is diseased, unwholesome, unscientific, contrary to biologic laws and entirely unsuited to serve as a basis for so important an institution as marriage."

DAMAGES ASKED IN SHELL BLAST

WASHINGTON, Feb. 21 (AP) — A bill introduced by Sen. McNary (R-Ore.) Monday asked the government to pay \$4000 to members of the Tarpley family of Rickreall, Ore., injured when

a shell fired onto their farm by national guardsmen exploded after being carried into the house.

Dan A. Tarpley, for whom \$2500 was asked, took the shell home. An additional \$500 was asked for Ernest H. Tarpley and \$1000 for Pearl Tarpley. The explosion occurred May 19, 1938.

The war department has picked a site near Holyoke, Mass., for the army's new northeast air base. Initial construction, to cost \$1,612,000, has been started. The base will cost more than \$8,000,000 when completed.

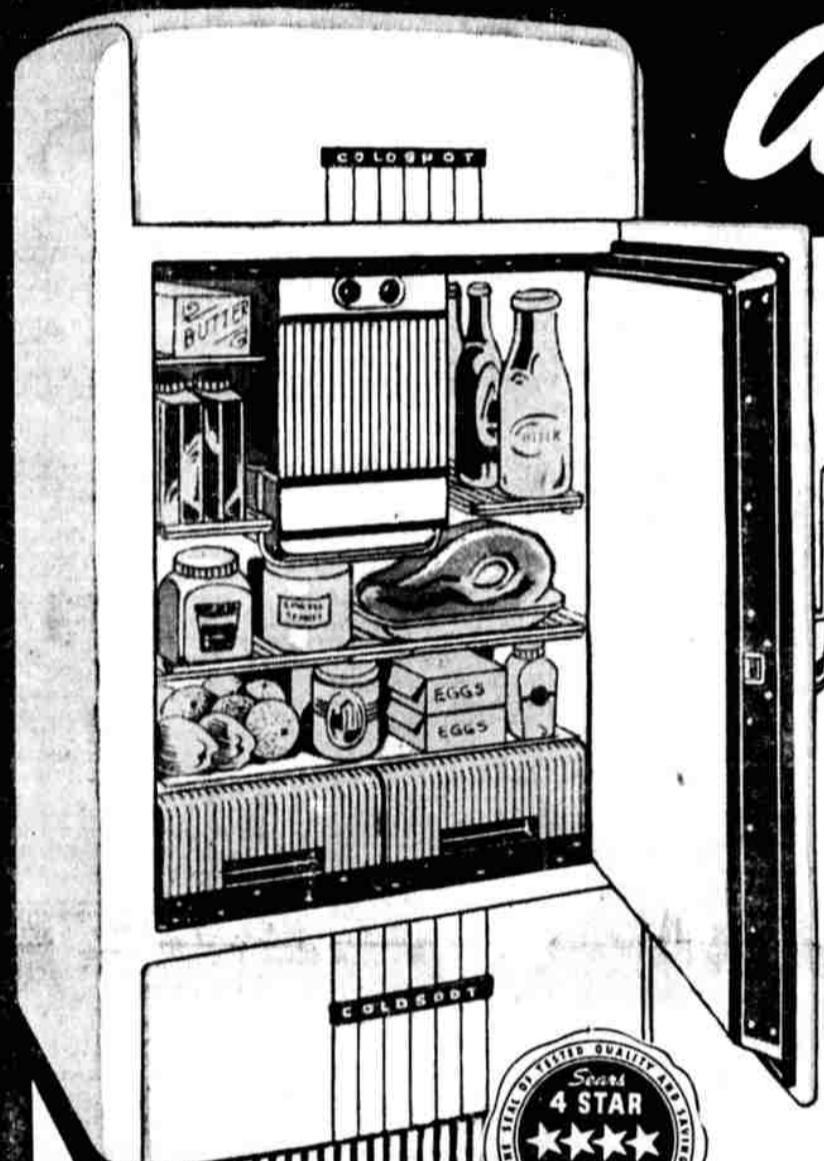

During the past 30 years, approximately two billions of square yards of concrete pavement have

been laid in the roads, streets, alleys and driveways of the United States.

Helicopters differ from autogiros in that power is applied directly to the canopy of whirling blades that lift the machine. Autogiro blades are authoritative and the machine is driven through the air by a conventional propeller.
