The business office of the Pacific Telephone and Telegraph company will be open for service in the new Klamath Falls telephone building next Monday, according to Charles E. Seavey, manager for the company here.

PACIFIC TRAIL ROUTES GIVEN

When the idea of a Pacific Crest trail from Canada to Mexico was first proposed, the forest service in the California region cooperated with the sponsors in selecting that part of the route which affects California.

The trail in California is really a designated route made by connecting existing roads, highways and trails located in general in a north-south direction. The route is travelable in its entirety, but only with difficulty, except for those experienced in mountain travel. There are one or two sections built primarily for tourist travel, such as the John Muir trail in the high Sierras, that receive heavy use and are maintained annually.

The Pacific Crest trail in California is not a forest service project and they have no maps showing its location. The forest service cannot recommend the California portion of the Pacific crest trail as a through route for the general traveling public.

The Cascade trail and Oregon Skyline trail follow the crest of the Cascade range in the national forests of Washington and Oregon for 870 miles. Maps of these portions may be obtained

by addressing the regional forest, Portland, Ore.
