

STATE TOURIST TRAFFIC OVER LAST SEASON

SALEM, Ore., Aug. 30.—Returns from 41 of 75 typical Oregon resorts questioned in a survey conducted by the travel department of the Oregon State Highway commission indicate that on the whole the state's tourist business for 1940 to date has been as good if not slightly better than that of 1939. Of resorts replying to the specific question of whether their business has been greater or less than in 1939, 21 definitely answered "better." Total of 17 reported "poorer." Three reported 1940 and 1939 business about the same.

Many of those in the tourist business are convinced that the monthly non-resident registration totals do not give an accurate picture of the flow of traffic in that a constantly increasing percentage is apparently failing to register. Although non-resident registration figures for the first seven months of 1940 show a decline of approximately 12 per cent, the state's gasoline tax collections, a measurement of traffic on the highways, was up \$575,755 at the end of July over the corresponding seven months of 1939.

In 1939, it is pointed out by the travel and information department of the highway commission, a heavy percentage of Washington and British Columbia traffic streaked straight through Oregon for the San Francisco fair and did not spend much time or money in Oregon. This was true to a degree on traffic from a number of other states. This year cars apparently tarried longer in the state. Nineteen of the 41 resorts reporting on the questionnaire survey said they had more non-resident car patrons this year than last. Seventeen reported less, and three said about the same as in 1939. Two gave no data.

PHOSPHATE ORDERS GO TO KACA GROUP

Klamath Agricultural Conservation association members participating in government crop programs have ordered half of the 250-ton supply of 45 per cent triple phosphate allotted to Klamath county for the last half of 1940.

The phosphate is advanced to members at \$2 per 100 pounds. Costs are taken from 1940 payments when the material is applied before November 30. When phosphate is ordered now and held for application in the spring of 1941 costs are taken from 1941 payments. Orders are now being taken at the association office in the federal building.

Use of the material is limited to non-depleting crops such as clover, pastures and alfalfa. On depleting crops such as potatoes or grain incurs a penalty of \$2 per 100 to bring the cost deduction to \$4 per 100 pounds.

Information at the county agent's office shows spring application to be most beneficial. Phosphate ties up with soils rather rapidly, being most available to plants when first applied. Application methods should get the material into the root zone. Broadcast applications show little downward penetration and lack of results frequently may be traced to insufficient depth of application. Application in drill rows by means of a fertilizer attachment on drills prevents excessive mixing with soil particles, lessens rapid tie up with soil and prolongs maximum availability.

Due to the tendency to combine with soil minerals, no phosphate is lost by leaching. That which forms insoluble compounds breaks down later and is again available in moderate quantities. Phosphates are removed by all crops. As contrasted to nitrogen, phosphate cannot be adequately furnished by return of crop residues or animal manures.

CHILL WEATHER BOOMS CLOTHING TRADE FOR WEEK

NEW YORK, Aug. 30 (AP)—Chill weather boomed retail trade in many communities this week, Dun & Bradstreet reported today.

"Buying was particularly spirited in women's and children's apparel and in home furnishings lines," the mercantile agency said, "but trade benefited generally from the increase in store traffic."

"Advertised specials in furniture, blankets, back-to-school wear and furs were said to have attracted good response."

"For the second consecutive week comparisons of retail trade

volume with those of a year ago revealed a slight widening of the margin of gain.

"Total volume for the whole country was estimated 7 to 13 per cent above the level for 1939, the largest increase recorded since last Easter."

The upturn in consumer demand, the agency added, caught some merchants unprepared and brisk re-ordering of autumn merchandise enlivened wholesale markets, contrary to the usual lull before the Labor day week-end.

DEFENSE IN MESS, SAYS CHADWICK

PORTLAND, Aug. 30 (UP)—Defense is in a worse mess than ever in the history of the nation, Stephen F. Chadwick of Seattle, told the Willkie-McNary Democratic club of Oregon here.

Chadwick, a life-long democrat and now a candidate for US senator on the Washington republican ticket, charged that national defense has been used by President Roosevelt as a vehicle to carry him into a third term.

"In 1938," Chadwick said, "as national commander of the American Legion, I invited President Roosevelt to speak before our annual convention."

But Mr. Roosevelt, Chadwick said, replied, saying he was completely engrossed in the European situation and "he was busy giving me the relative strength of the axis powers."

"He told me," Chadwick said, "he felt that France would not survive and that England was in danger."

Despite this knowledge, Chadwick said, the president declined to inform the American people of the situation because "he wanted to build up a crisis psychology for a third term."

That demand for a third term, he charged, came from a "bunch of self-perpetuating bureaucrats."

Chadwick called for a national defense program in the "hands of businessmen" and called Wendell Willkie "the best business man in America."

CHURCHILL TAKES ORDERS, DISCARDS HABITUAL STOGIE

LONDON, Aug. 30 (AP)—A provincial mayor gave orders to Prime Minister Winston Churchill in an air raid on the Kent coast Wednesday.

As the premier entered an underground shelter, puffing his habitual cigar, Mayor A. B. C. Kempe of Ramsgate said sharply: "Put out that cigar, Mr. Churchill!"

Churchill dropped the forbidden stogie on the sand floor. "There goes a good 'un," he said wryly.

Earthworms eat through the hardest soil, yet they have no hard jaws and no teeth.

Napoleon Bonaparte has been the subject of more than 70,000 books, more than any other popular character or topic in the world.

STATE FAIR DRAWS LARGE ENTRY LIST

SALEM, Aug. 30.—Entries for the two major horse events for the Oregon state fair, which opens here Monday morning, September 2, are exceptionally heavy this year, just as are entries in all open class divisions of the fair and especially livestock, fair officials report.

In the entertainment line, horse lovers will find both the night horse show and the pari-mutuel racing meet as chief attractions the first six days of the fair. Neither of these events is scheduled for the closing Sunday, which, however, will see presentation of the All-American revue, 1940 edition. The revue is also a nightly feature during the week and will be presented by a troupe of 51 singers, comedians, dancers and actors, most of whom are direct from Treasure Island.

Horse show entries, which closed Wednesday noon, are the largest in many years with a strong competition promised especially in all the stake classes and jumping events. Three-gaited and five-gaited entries are more numerous, and number virtually all the best horses in western Oregon. A number of horses not seen at previous fairs will be on hand. Oregon owners will face competition from only two outside horses, a jumper belonging to Mrs. M. E. Robertson of Napa, Calif., and Roy Johnson's "Steppin' Along" from Spokane.

Besides two light horse entries from Kent and Moro, four big six-in-hand teams will represent eastern Oregon in the horse show, and will compete for the \$500 stake—largest in the show—and the D. F. Burge perpetual trophy. These are owned by W. C. Heiler, Kent; Norval H. Martin, mayor of The Dalles; T. M. Roise of Grass Valley, and Tom Fraiser and son, Moro.

At the race track, fair goers will find many new horses, new owners and a number of new jockeys. More than 175 stall reservations for bangtails were on hand Wednesday morning which is a real record as most entries come in the three days before the meet opens. Two harness events will be run each day and eight running races.

ON TIME

BEND, Ore. (AP)—A Massachusetts tourist asked Miss Rae Beaver of the Oregon Motor association "what time must we reach Crater lake to see the Phantom ship go by."

The Phantom ship is a rock formation in the center of the lake.

Experts rank the 20 varieties of headaches as next to the common cold in causing the greatest loss in business efficiency.
