## Symphonic Styling Featured In 1941 Hudsons

All new 1941 Hudson models are lower, longer, and more graceful in "tailor-made" styling. The new body styling is the sweep of the new rear deck design with the accompanying new design of rear quarter windows and a roof panel. This new styling in combination with a 2-inch reduction in overall body height and an increase in body length of 5 1/2 inches, enhances the smooth, harmonious flow of body lines. The model shown above is the Commodore Eight Touring Sedan on 121-inch wheelbase and powered with 128 horsepower engine. Featured in all 1941 Hudsons is a new style development called Symphonic Styling which offers a choice of interior color combinations that harmonize with exterior colors.

Its new aeromotor will be America's only six-cylinder engine of valve-in-head, twin ignition, a U. S. government specification for commercial aircraft, Bles said. The new Nash cars will be on display at Wisener Nash Motors soon, according to R. D. Wisener.
