

# RADIO SCHOOL PLANNED FOR LOCAL YOUTHS

Arrangements have been completed with the National Youth Administration for the establishment of a radio project to provide employment, work-experience and training for young men and some young women of Klamath county between the ages of 17 to 24 inclusive, it was announced Thursday by Percy Murray, chairman of the Klamath county school board.

Members of the school board and other interested persons met Tuesday night at Klamath Union high school with O. A. Steel, NYA state radio engineer, and Earl I. Rice, NYA area director. Final plans were announced for inauguration of the course in the near future.

The project will be housed in the ground-level room of the new gymnasium wing of the high school building. The National Youth Administration will furnish and install several hundred dollars worth of radio construction and training equipment and

provide a full-time, well-qualified supervisor, Rice announced.

The course will consist of two sections, each operating for 90 class-hours per month. Each section will accommodate about 12 enrollees.

The enrollees will be paid \$18.48 per month during the course for 56 hours of productive project work. The balance of the 90 hours will be devoted to classwork in radio, telegraph, code operation and theory.

The project work, Rice said, will consist of construction of various types of radio equipment. Each assignee will be required to engage in related training in radio, telegraphy (code operation), and will receive theory instruction in circuits, design, trouble shooting and repair.

An NYA network radio station will be established at the high school, it was made known.

Object of the work experience and training is to prepare young people for paid employment in various radio fields. The course will require from six to nine months for the average enrollee.

Those interested can register at the Oregon State Employment office at the Elk Hotel building, or apply directly to the NYA area office at Medford.

According to the National Highway Users conference, the average motor vehicle owner in the United States paid 27.30 in excess of his fair share of road costs in a single year.

# Argentina President Says Fifth Column Constitutes Grave Danger for Americas

By WILLIAM POZZO  
United Press Staff Correspondent  
BUENOS AIRES, Nov. 21 (U.P.)

President Robert M. Ortiz, of Argentina, in an interview given to the United Press Tuesday, warned the Americas are faced by a grave crisis, with subversive doctrines working against democracy.

Ortiz appealed for a broad program of cooperation by the nations of America "to establish their defense against foreign perils."

The correspondent was received by Ortiz in a special audience for the express purpose of discussing the international situation, despite the fact the president is still convalescing from a serious illness which five months ago forced him temporarily to delegate his powers to Vice President Ramon S. Castillo.

Ortiz said he does not regard as an imminent peril the "physical occupation" of the American continent, but the principal danger lies in the "ideas of dissolution" now at work. He declared he believes a "community of ideas," which he regards as so necessary between the nations of America, must be considered only as a complement to a program of

action or "technical cooperation" among the Americas.

He asserted the value of the recent visits of the chiefs of staffs of armies of the Latin American countries to the United States, especially that of General Guillermo Jose Mohr, of the Argentine army, will be enormous.

Ortiz made it clear Argentina approves of the United States' plan for hemisphere defense and that Argentina is willing to cooperate therein, thus confirming previous United States dispatches.

He indirectly implied, however, Argentina may object to the establishment by Uruguay of a powerful base at Punta Del Este, at the mouth of the Plate river, asserting he had no doubt that when the moment arrived to decide on definite locations for the establishment of bases in Uruguay, "our traditional friend, Uruguay, will take our interests into consideration."

State sales taxes on automobiles, parts and accessories amounted to \$76,000,000 in the year 1939. State gasoline taxes were more than 10 times as great, standing at \$816,433,000 last year.

# GUARDS READY TO TRAIN DRAFTEES

CAMP MURRAY, Wash., Nov. 21 (AP) — National guardsmen from the Pacific northwest states, who have received three months intensive training here, now are ready to train conscriptees and expand their 41st division to 18,000 men, Maj. Gen. George A. White, commanding officer, said today.

"We're fast becoming a hard-core army outfit," he said.

Within the past three weeks

784 men gained new "stripes" as the division expanded its non-commissioned officer personnel in anticipation of the assignment of 6300 conscriptees next January.

More promotions are slated.

The division will be able, when it goes on a war-time footing, to fill all but the field artillery and the medical corps with its own officers, General White said. Reserve officers will be used to fill the gaps.

"Our men have become so hardened in their first three months of training that some outfits are marching 13 miles a day without showing strain," General White said.

"We've trained in wind and

rain and bitter weather and at first our housing was hardly adequate. The morale of the men is splendid. There is little sickness. The men are healthy from being in the open air. They're getting a balanced diet, sound rest and good care. We've got a 'city' of 12,000 yet today the records show only 115 colds and no serious illness. No civilian town could boast that record."

Sometime during January the division will move into its permanent cantonment three miles south of here.

The division is composed of citizen soldiers from Washington, Oregon, Idaho, Montana and Wyoming.

# WEATHER

NORTHERN CALIF.: Fair and cool tonight and Friday; light morning frost; moderate to fresh northwest wind off the coast.

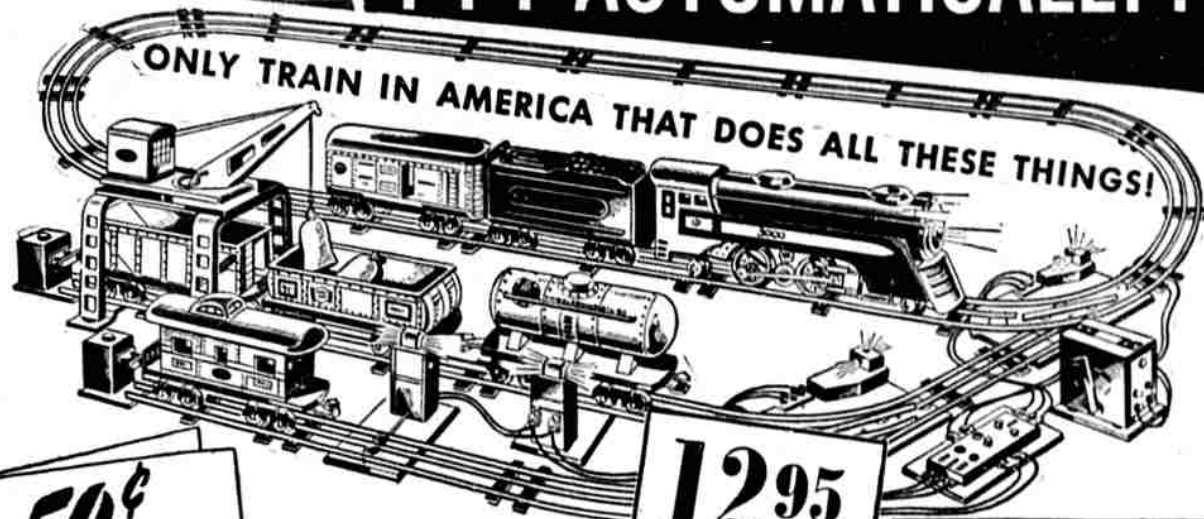

OREGON: Partly cloudy tonight; Friday generally fair, and becoming unsettled northwest portion; somewhat colder west portion tonight; local valley fogs; moderate northerly wind off the coast.

The automobile industry uses 75 per cent of America's annual consumption of plate glass, or some 117,725,000 square feet.

**BOYS! GIRLS! TELL DAD WARDS TOYLAND HAS THE MOST UNUSUAL TOYS IN TOWN . . . AND FOR LESS**

**SWITCHES CARS . . . COUPLES and UNCOUPLES . . . AUTOMATICALLY!**

**50¢ down**  
holds any toy purchases up to \$5 'til Dec. 20! Buy NOW to make sure youngsters have them for Xmas.
