

SPRAGUE PICKS ADVISERS FOR DRAFT APPEAL

SALEM, Aug. 19 (AP)—Governor Charles A. Sprague announced the appointment today of advisers to assist state selective service appeal boards in granting occupational deferment to registrants for the draft.

They will represent labor, industry and agriculture, and will assist selective service officials in "collection and dissemination of information needed for occupational deferment of workers whose retention in industry or agriculture is vital to the national safety, health or interest," the governor said.

The advisers will serve without pay, but their work "is regarded as a patriotic service to the cause of national defense," the governor said.

The advisers, and the appeal boards to which they are assigned, follow:

Representatives of industry—appeal board No. 1: F. A. Graham of Jasper and W. C. Christensen of Hillsboro; appeal board No. 2: E. C. Van Petten of Ontario, and R. B. McGinnis of Granite; appeal board No. 3: R. B. Ambrose and L. C. Newland, both of Portland.

Representatives of agriculture—appeal board No. 1: Glenn Riddle of Riddle, C. E. Marks of Roseburg, and Harold Horner of Estacada; appeal board No. 2: Frank Emerson of The Dalles, G. J. Hillyard of Klamath Falls, and Harry Proudfoot of Wasco; appeal board No. 3: H. C. Compton of Boring and M. B. McKay of Troutdale.

Representatives of labor—appeal board No. 1: George I. Baker of Vernonia, and Harvey Tripp of Marshfield; appeal board No. 2: Fay Baird of Pendleton, and Arthur A. Oyler of Klamath Falls; appeal board No. 3: Burton Walker and William H. Fitzgerald, both of Portland.

Pierce Attacks Delay in Picking Aluminum Sites

WASHINGTON, Aug. 19 (AP)—The aluminum manufacturing program has been held back by the government's decision to locate aluminum factories at a distance from Bonneville dam, Rep. Pierce (D-Ore.) has charged.

"The criminal delay in producing aluminum is even worse than the dollars wasted," he told the house.

The government proposed to construct plants at Tacoma, Spokane and about 20 miles from Portland. Pierce said that aluminum would cost \$6 more a ton than if the plants were situated near the power-generating plant.

No definite decision on the sites has been made, although it is 90 days since the construction program was announced, he added, declaring the delay equivalent to 100,000,000 pounds of aluminum.

"These delays in one plant alone amount to 133 largest bombers and over 800 average fighting planes a month. If the OPM, FPC, RFC and other alphabetical agencies were actually interested in aluminum production and the resulting airplane manufacture, they would have located the aluminum plants promptly and most advantageously close to the bus bar," Pierce said in extension of remarks.

BIOLOGIST DIES
WESTFIELD, Mass., Aug. 19 (AP)—Charles B. Wilson, 79, biologist who conducted numerous surveys for the government, former head of the science department at Westfield State Teachers college, author of science textbooks, died last night.

Complete Feminine Hygiene demands:

1. Arrid does not rot dresses, does not irritate skin.
 2. No waiting to dry. Can be used right after shaving.
 3. Instantly checks perspiration 1 to 5 days. Removes odor from perspiration, keeps armpits dry.
 4. Arrid is a pure, white, greaseless, stainless vanishing cream.
 5. Awarded Approval Seal American Institute of Laundering as harmless to fabric.
- Women use more Arrid than any other deodorant. Try a jar today!

Small Motifs Trim Many Linens

Household Arts by Alice Brooks

Quickly Made You'll Find Them Very Useful

PATTERN 7071

Here's a gem of a pattern for the needlewoman—quantities of small motifs to make your linens sparkle. Some are even small enough to add an individual touch to handkerchiefs. Pattern 7071 contains a transfer pattern of 42 motifs ranging from 1 1/2 x 8 inches to 1 1/2 x 1 1/2 inches;

illustrations of stitches; materials needed.

To obtain this pattern send ten cents in coin to The News and Herald, Household Arts Dept., Klamath Falls, Oregon. Be sure to write plainly your NAME, ADDRESS and PATTERN NUMBER.

Closing Date Near for Annual 'Most Attractive Child' Contest

With the closing date set for Thursday, the twelfth annual "Most Attractive Child" contest is attracting more and more entries each day, according to Catherine Gaylord, owner and manager of Kennell-Ellis studios, which sponsors the contest each year.

More than 700 children have entered the contest, which is open and free to all youngsters from 10 years down to five months of age. No appointment is necessary for a sitting, mothers and children merely dropping into the studios when they are down town, Miss Gaylord stated.

The "Most Attractive Child" contest is awaited eagerly by many parents each year, Miss Gaylord said, since a year-by-

year photographic record of the most changeable years can be kept in this way. There are, this year, 39 awards and honorable mentions for 39 winners.

The contest is divided into classes, with older girls competing among themselves, older boys with each other, younger girls and boys vying in the same manner, and babies under one year old in one group without regard to whether they are boys or girls. There is also a special entry for twins, both boys and girls.

Miss Gaylord cautioned parents to avoid delay in bringing their children to the studios to enter the contest and sit for photographs, because, with the last day set for Thursday, a rush of belated entries is expected.

rich widow preceded a quarrel in McNary's hotel room, where the shooting occurred. Holmes was blinded by a bullet from his own pistol after McNary was slain.

Paperboard Price Agreement Reached

WASHINGTON, Aug. 19 (AP)—Leon Henderson, price administrator, said today west coast manufacturers of paperboard had agreed to continue until December 31, 1941, prices agreed upon last June, unless unusual circumstances arose.

The base prices which will prevail on deliveries of 10 tons or more are: plain chip \$50 a ton; single manila \$63.50 a ton, and white patent coated \$80 a ton.

Henderson said differentials for other grades in effect on April 1, 1941, were to be applied to these base prices.

CHRISTIAN SCIENCE GROUP SENDS AID

One war relief activity which has been little publicized is the Christian Science war relief committee, with main offices at 237 Huntington avenue, Boston, Mass. Two thousand nine hundred and ninety nine cases—half a million garments—valued at \$498,368.23, in the nine months of the committee's existence, is their record to date.

The work is an activity of the Mother Church, the First Church of Christ, Scientist, in Boston, and branch Christian Science churches throughout America. Only new garments of those comparable to new are accepted by the committee. These are furnished almost entirely by members of the Christian Science organization. They are shipped to a central Christian Science committee, in London, where they are allocated to different almshouses in England and Scotland. The work is in the hands of members of the Christian Science denomination until the garments are distributed. They are gladly given to any person in need, regardless of denomination.

It is the purpose of the committee in the United States to keep its depots in England supplied with an adequate amount of clothing and blankets for emergencies; so, the London committee is becoming known as a storehouse from which emergencies can be met. This was evidenced by the fact that it was crates of clothing from this committee which first reached Coventry and when the great fire occurred in London, the Christian Science War-time committee was able to meet an appeal for blankets. Fortunately, many hundreds of blankets had been shipped and had just arrived.

Not only are garments made by sewing units in about 1300 places throughout the United States, but thousands of new garments are purchased and sent, from a war relief fund generously contributed by Christian Scientists. Three motor kitchens have been sent and a motor truck

or van is maintained in England for quick deliveries.

The committee in Boston is grateful for the record of goods sent as well as for the fact that because services are so largely voluntary, its overhead expense is only 4.1 per cent. It also rejoices that less than one per cent of the goods shipped is all that has been lost by sinkings.

The main depot for shipping to England is located at Boston, but shipments are also made from New York City, Los Angeles, and from Portland, Ore., where the shipping depot is located at 922 Southwest Columbia street, and the workroom at 1237 American Bank building, where used material may also be sent.

Klamath Falls headquarters is located at 1962 Melrose.

DOCTOR INDICTED

SALEM, Aug. 19 (AP)—The Marion county grand jury last night indicted Dr. J. A. Wondrick, Salem physician, on a charge of manslaughter in connection with illegal practice of medicine. He was held in lieu of \$7500 bail.

LARGE POTATOES GROWN NEAR VALE

VALE, Aug. 19 (AP)—Potatoes grow to large size in this area, an exhibit disclosed here Monday.

One tuber grown by Charles Garrison of Jamieson weighed two pounds, nine ounces, and was perfectly formed. Another grown by James Ihry weighed 53 ounces.

Prices are so low, growers report, that little more than expenses are obtained from them. Farmers in the East Bench district reported that growers used sacked potatoes to fill chuck holes in the highway over which spuds to be shipped were being hauled.

Today it has become clear that Hitler was playing a perfidious game.—Fritz Thyssen, German industrialist and "angel" of the early national socialist movement.

Salem Council Drops Parking Meter Plan

SALEM, Aug. 19 (AP)—Because of bitter opposition by business men, the Salem city council last night abandoned its plans to give parking meters a trial on downtown streets.

The action was taken when it appeared that the Salem retail trade bureau's referendum movement against the meters would be successful.

Exams Scheduled For Civil Service

The United States civil service commission announces the following open competitive examinations:

General automobile mechanic, automotive mechanic - welder, a u t o m o t i v e mechanic-welder (diesel).

These examinations are for the purpose of filling existing and future vacancies in the various services throughout Idaho, Montana, Oregon and Washington.
