## FOOD COUNCIL TO SEEK DATA ON SELECTEES

Plans for a unified effort towards good nutrition in Klamath county are progressing rapidly, as was revealed by the third meeting of the county nutrition council for defense held October 7 in County Agent C. A. Henderson's office. Attending the meeting were, C. A. Henderson, county agent; Mrs. Winifred K. Gillen, home demonstration agent; Dr. P. H. Rozendal, county health physician; Arnold L. Gralapp, superintendent, Klamath Union high school; Percy Wells, city school superintendent; Mrs. Isabelle Brinker, county school supervisor; Mrs. Walter West, WPA area supervisor; Mrs. Dorothy Huffman, county health nurse; Paul Roberts of the Klamath County Public Health association; Elizabeth Baker, representing the Red Cross; Earl A. Gardner and Edward G. Axtell of the farm security administration.

In carrying out the program of nutrition for defense, a fact-finding committee has been organized to list all organizations interested in aiding the program, to find what percentage of draftees were rejected and what were the causes of rejection, to assemble facts concerning nutrition, and to investigate nutrition conditions in this county. Dr. Rozendal of the fact-finding committee, reported that a survey is being made from the records at the health unit to determine the number of people treated for ailments caused by malnutrition. A letter of request has been sent to Dr. Verden E. Hockett, Lt. Commander, M. C., U. S. Navy, who is state medical officer of selective service, for information regarding the percentage of rejection among the draftees and the causes of rejection. The plan for coordination among various organizations in working on nutritional problems in the county and on the ways

of improving the health and welfare of the people is being carried out. A meeting will be held October 13 in the Fremont school auditorium at 2 p. m. with representatives from organizations who can help in the nutrition program. The national nutrition program will be explained at this meeting and the help of each organization will be enlisted. Gralapp reported that the schools are working in cooperation with the council and that classes in home hygiene, physical education, health and nutrition will be offered after the first of the year.

It was announced that nutrition meetings are now being held in this county. Twenty-eight leaders attended the leaders' meeting held September 25 and 26. Fourteen communities were represented at this meeting. Leaders and speakers are needed to carry out the program. Cooking classes are now being held in various communities to further the need for better planned meals and adequate diets. Dates and places of the meetings may be obtained at the county agent's office, in the federal building.

In order to help publicize the nutrition program and make people nutrition conscious, an exhibit at the Merrill Potato festival is being planned. Pastries, vegetables, canned goods, and a sample of a well-cooked meal will be used in the exhibit in order to point out the advantages of good nutrition to individual and national defense.

County Agent Henderson explained the national effort which is being made to increase farm production to supply the people with adequate food. A survey is to be made among the farmers to determine how each can increase production in the interest of our national defense program. It is becoming more and more apparent that we must "make America strong by making Americans strong." That is why nutrition is important to national defense. Good health is absolutely necessary to national defense; good nutrition will aid in building necessary good health. This is the purpose of the nutrition council. The next meeting of the council will be held on Thursday, November 6 at 10 a. m.
