NO SURPRISE SEEN IN PLAN FOR U. S. WAR

By DeWITT MacKENZIE Wide World War Analyst The Chicago Tribune caused much discussion with its copy righted report that a joint army navy board has prepared a con-fidential recommendation which includes provision for an American expeditionary force of 5, 000,000 to fight the axis by July 1, 1943,

That report will stir diverse emotions among the American public—but surprise shouldn't be one of them.

Surely there can be few peo ple who don't recognize by this time that the United States is at war with the axis.

Since this is true, the logical corollary is that the government must be prepared to implement the commitment by action. This means that our army and navy chiefs must prepare plans, and they must do so before the event and not after it, unless we have

been bereft of all reason. As White House Secretary Stephen Early pointed out yes-terday, it is the duty of the navy and the army, even in peace times, "to study and devise plans for all possible emergencies. Even the most immediable situs. Even the most improbable situa

Even the most improbable situa-tions are studied and planned." Every major power in the world has filed away in its se-cret archives plans calculated to meet all sorts of hypothetical positions. It would be astonish-ing and most disconcerting to learn, for instance, that our fighting branches didn't have detailed plans for our conduct in Japanese, shrewd people that they are, naturally are equally prepared. I'll even wager, despite the

war and navy departments know what they would do if the im-Nost certainly if Hitler tries al defense failures."

en invasion of Britain-and that remains a possibility-the Brit-ish will ask us for naval aid unless they are able to crush the bazi attempt right at the start. Should things go badly for the allies in the Mediterranean. allies in the Mediterranean, there would be a demand for our

navy. We don't need to rehash the dangers of the Japanese-American crisis

But what about an American expeditionary land force-say the 5,000,0007 Well, come the spring and the intensified fighting, the allies are going to need well-trained and well-equipped man-power. It will be a sur-prise if they don't turn to Uncle

Sam for it. The great call for man-powe will come from the middle east and the Russian theatre, as I view it. More and more it seems that this front will develop the decisive land engagements of the war. As remarked before, ultimately the allies will undertake an invasion of western Europe, but this can only come after the German resistance has been bro-ken from other directions.

The British have a great army the British Isles for defense, or for western continental inva-sion when the time is ripe. The Yankees will be wanted in eastern Europe and the middle east as things look now.
