

EMPLOYMENT UNDER FEDERAL CONTROL NOW

The Klamath Falls office of the Oregon state employment service is being transferred from state to federal control, effective January 1, 1942, and will hereafter be operated as an office of the United States employment service, L. C. Stoll, United States employment service director for Oregon, announced Friday.

Stoll said that the 24 offices of the state department are being made federal offices this week, following President Roosevelt's request to the governors of the states on December 19, 1941, asking that arrangements be made to transfer the personnel and the necessary equipment to the federal government in a nation-wide re-organization of the employment service to meet increasing labor demands of the war industries.

All employees of the state unemployment compensation commission, who are engaged in employment service functions, will become federal employees at their present rating and salary under the state merit system.

The Klamath Falls office will remain in its present location, 242 Main street, under the management of Jack Almeter, but will operate under the name of the United States employment service.

Claims for unemployment insurance, under the state law, will continue to be taken at the Klamath Falls office by federal employees, and transmitted to the state agency for the usual determination as to eligibility.

FOUR-PLY GUARD AGAINST ATTACKS

NEW YORK, Jan. 2 (Wide World)—A four-ply guard against the possibility of enemy bomber attacks against continental United States has been set up by the army and the navy.

On both the east and the west coasts air and sea patrols are maintained at a considerable distance from shore to eliminate surprise.

On the seaboard proper defending fighter planes are on "ground alert" at scores of fields, ready to take to the air if enemy planes approach.

Anti-aircraft units rapidly are being installed at key points to help ward off attacks on cities, factories, air fields, docks, railroads, bridges and such vital targets as water supply lines and gas and electric plants.

Finally, an elaborate air raid precaution service has been organized among civilians. If enemy planes escape the notice of the patrols far at sea, they can be spotted by thousands of observers at picked posts.

When the attack comes—if it does come—it is unlikely that a repetition of the surprise Pearl Harbor foray can occur.

That does not mean that enemy bombers cannot reach vital objectives. They have a couple of million cubic miles of air through which to fly, strike and flee. It does mean that a seaboard attack in great force and without heavy casualties among enemy airmen would be difficult.

The army maintains a ground alert instead of an air alert in order to have the maximum number of planes to muster for an attack on enemy bombers. An air alert means a constant patrol at varying altitudes.

When fighter planes are kept on the ground, ready to take off on a second's notice, their fuel tanks are always full and their pilots are rested.

The type of plane with which defending American fighter pilots probably would have to cope in an initial attack would be dive bombers. Usually this type carries only a pilot and a rear gunner. Dive bombers are slower than either standard heavy bombers, such as the American flying fortress, and the single seater fighters.

In an attack on this country they would be expected to approach in formation. That enables gunners to mass their fire against attackers. In diving on targets, they "peel off" from the formation, aim the plane at what they want to hit, release the bomb and level off.

Canadian Whaling Plants Canada has only two whaling plants, both in the province of British Columbia. They took 219 whales in the four-month season of 1940, compared to 310 in 1938.

CHURCHES IN THE WAR During the World war, 2626 churches were destroyed. All but 50 of these were repaired or rebuilt before the start of World war II.

The Goose Hangs High--- Top Off Dinner With Pie

Some families prefer less traditional desserts than mince pie, plum pudding. The two molasses recipes given here are old-fashioned in one way but very much 1941 in another. Incidentally, they're rich in iron.

Eggnog Pie With Ginger Snap Crust

(Makes 10-inch Pie)
Three teaspoons gelatin, 3 cups milk, 3 eggs, separated; 1 cup, plus 1 tablespoon old-fashioned molasses, 1 cup heavy cream (1/2 pint), whipped; 1-3 cup sugar, 1 teaspoon salt, 1 teaspoon vanilla or rum flavoring, ginger snaps, nutmeg.

Soften gelatin in 1 cup cold milk. Then add remaining 2 1/2 cups milk, heated to scalding. In top of double boiler mix egg yolks, 1/2 cup molasses, sugar, and salt. Add milk and gelatin mixture. Stir over boiling water until sugar and gelatin are dissolved. Remove from over hot water, add flavoring; fold in egg whites, stiffly beaten. Cool. Fold in half the whipped cream. Pour into pie plate lined with ginger snaps (both sides and bottom of plate lined to form a crust.) Chill until firm. Top with remaining half of whipped

cream into which is folded the tablespoon of molasses. Sprinkle top generously with grated nutmeg.

Spicy Apple Crumb Pie

Six to eight tart apples, 2 tablespoons butter, 1/2 teaspoon cinnamon, 1/2 teaspoon allspice, 1/2 cup fine crumbs, 1/2 cup dark molasses, 1 recipe plain pastry.

Line pie pan with pastry and crimp edges. Place in refrigerator until apples are ready. Wash and pare apples, quarter and core all but one apple. Take this one (large) apple and remove the core, slice quite thick (use for center of each layer of apples in the pie.) Slice quartered apples fairly thick. Melt butter in saucepan; add crumbs and spices. Mix well. Arrange apples in layers in prepared pie shell, using "doughnut-like" slices of apples for the center. Over each layer sprinkle buttered, spiced crumbs. Pour old-fashioned molasses over top of filled pie. Bake 10 minutes in hot oven (450 deg. F.), then decrease heat to 350 deg. F., cover top with piece of wrapping paper, continue baking additional 40 minutes until apples are tender and glazed over top.

An Egg a Day Will Keep Children's Medico Away

An egg a day will help keep the children's doctor away. And adults should have at least four eggs a week; more if possible.

The following buying and storing hints from Mrs. Frances Foley Gannon, New York market expert will help you get your money's worth:

There are four grades of eggs: "fancy," "grade A," "grade B," "grade C." Fancy and grade A eggs are those of the highest quality in respect to freshness, firmness, color and odor.

Grade B eggs are good edible eggs, especially for cooking. Grade C is, of course, the lowest grade, but still edible.

An egg kept in a dealer's window with the sun beating down on it will be less fresh in 24 hours than a much older egg that is stored in a cool place.

Many women do not realize that the color of the shell has no bearing whatsoever on either the quality or the food value. The condition of the shell, on the other hand, does.

Immediately after bringing your eggs home, put them in the refrigerator—it is not necessary to place in the coldest spot. Keep them as far as possible from highly scented foods, as the shell is porous and easily absorbs odors. Do not wash eggs because the water will remove the "bloom" that forms a natural seal for the pores of the shell.

Here are two inexpensive luncheon recipes using eggs. They make perfect hot main dishes for children's meals:

EGGS GOLDENROD

(Serves 4)
Three tablespoons butter, 2 tablespoons flour, 2 cups milk or 1 cup evaporated milk and 1 cup water, salt, paprika, 4 hard-cooked eggs, 4 slices buttered toast.

Make a white sauce of the butter, flour and milk. Season with salt and paprika. Separate the yolks and whites of the eggs. Chop the whites, add them to the sauce, and pour over the toast. Sprinkle with the egg yolks which have been rubbed through a sieve.

SCRAMBLED EGGS AND NOODLES

(Serves 4)
Two eggs, 1/2 teaspoon salt, dash of pepper, 1/2 teaspoon

grated onion if desired, 1/2 cup milk, 1 cup cooked noodles, 1 tablespoon butter.

Beat eggs slightly, add seasonings, milk and noodles, and turn into skillet containing melted butter or oil. Stir constantly over low flame until mixture thickens. Serve at once.

TOMORROW'S MENU

BREAKFAST: Sliced oranges, fried cornmeal mush, syrup, coffee, milk.

LUNCHEON: Eggs goldenrod, mixed greens salad, frosted cup cakes, tea, milk.

DINNER: Liver and bacon, boiled potatoes, baked stuffed tomatoes, apple turnovers, coffee, milk.

Five Killed As Big Army Bomber Crashes, Explodes

MINEOLA, N. Y., Jan. 2 (AP)—A twin-engine army bomber crashed into a gravel pit in Garden City park on Long Island Thursday killing five men instantly.

Eyewitnesses said the plane struck a high tension wire half a mile from the pit and exploded twice after striking the ground.

The explosions were heard five miles from where the plane crashed into a gravel pit operated by the Colonial Sand and Gravel corporation.

Army officers said the plane showed signs of distress when it reached West Mineola. It was heading for an open field when it lost altitude and struck the high tension wire.

SHORTEST RAILROADS

The shortest railroad in the United States, only one mile long, is at Westline, Pa., but it deserves its revenue from its switching service and freight. The shortest railroad to carry passengers and mail runs between Beaufort and Morehead City, N. C., and is 3.3 miles long.
