

LICENSE PLATE TABS ORDERED BY WAR BOARD

WASHINGTON, March 20 (AP) — Future automobile license plates will be "small date tabs" of not more than four inches square attached to present license plates to bring them up to date, under a war production board order issued Wednesday.

The board prohibited the states from issuing more than 10 per cent by weight of the usual number of plates and these only for new licenses and to replace plates lost or destroyed.

Nothing that it would be advisable to be sparing of metal, (PB) gave notice that there was no guarantee that the states or other local governments will get sheet metal sufficient to meet the 10 per cent requirement.

The order was announced by Maury Maverick, chief of the WPB government requirements bureau. He said the restrictions did not apply to metals already cut or stamped on March 18. During every licensing year hereafter, Maverick said, the states will be permitted to issue plates up to 10 per cent by weight of the plates issued during the corresponding license year ending after June 30, 1941, and before July 1, 1942.

SALEM, March 20 (AP) — Oregon might use windshield stickers next year instead of the small date tabs recommended in a war production board order to license plates today, Secretary of State Earl Snell said.

Snell pointed out, however, that the 1941 legislature enacted a law providing that the 1943 plates must carry advertising matter about that year being the 100th anniversary of the Old Oregon trail. The plates were to bear the words "Old Oregon Trail 1843-1943."

He said he would call a conference soon of persons interested in the Oregon trail anniversary celebration, and added that the advertising matter might be printed on the stickers or tabs, whichever is used.
