

GILMAN NAMED UNION HEAD AT SPRAGUE RIVER

SPRAGUE RIVER.—Don Gilman was reelected president of the local branch of the Carpenters and Joiners union, AFL, at the annual election meeting held Sunday afternoon in the school gymnasium. Other officers elected were, vice president, Bill Gilpin; recording secretary, Russell Kernan; financial secretary, Ben Hansen; treasurer, Harold Robins; one year trustee, Roy McDonald; conductor, Roland Parks; warden, Robert Hagen.

The Sprague River branch of the union looks back over an active and successful year. During the past year a record number of initiates have been taken into the local. There has been a large turnover of labor in the mill here, due to defense activities.

Hugh Haddock, former president of the Sprague River branch, was promoted to business manager of the office at Klamath Falls. He was succeeded here by Don Gilman, well known in this area and the Bonanza region, where he attended high school and lived for a number of years.

Chief accomplishment of the union here during the past year was the drawing up and the settlement of a contract between the employes and employers. Wages this year are approximately 10 cents an hour higher than they were this same time last year. Another important feature of the contract is the vacation-with-pay clause.

During the year the local union has at various times sent delegates to northwest labor meetings, where valuable information was gained.

Members of the local union include all workers in the Crater Lake Box and Lumber company and the woods' crew located between Bonanza and Beatty.

CIVILIAN DEFENSE UNITS ORGANIZED

SALEM, July 1 (AP)—Creation of two new units of the civilian defense organization was announced Tuesday by State Civilian Defense Coordinator Jerrold Owen.

The U. S. citizens service corps will include those working in such activities as consumers' interest, salvage, recreation, war savings, education, health, nutrition, transportation and other types of community war activity carried on with the approval of the state defense council.

The civilian defense auxiliary group will include persons who, because of their civil occupations, should be eligible to be on the streets and perform their duties during blackouts and air raids.

Special insignia will be provided for members of each group. The new units are in addition to regular civilian defense activities.

Members of the service corps must complete prescribed courses, and must have completed 50 hours of work in a position approved by the county defense council if no specific training course is required.

Every jar of fruit you put up helps lighten the load on commercial canneries and helps relieve overworked transportation facilities.—Dr. Louise Stanley, department of agriculture official.

You are Americans, and it is good to be Americans.—Robert E. Sherwood, deputy coordinator of information.

Hitler, Duce Meet Takes Back Seat to Roosevelt, Churchill Conferences

During the momentous Roosevelt-Churchill conferences, the get-togethers of Adolf Hitler and Benito Mussolini have been relegated to the background. Here Il Duce, center, inspects a guard of honor of helmeted Nazi troops in Salzburg, during a recent conference with Hitler, who accompanies him on the right. (NEA Telephoto)

DENTIST INVENTS ONE-SHOT HYPO

SEATTLE, July 1 (AP)—A Seattle dentist, with an eye for invention as well as cavities, has devised a one-shot hypodermic syringe which he foresees as a life saver for wounded men on the battlefield. It's a cellulose-wrapped automatic device, to be used and discarded like a paper cup.

Dr. Ralph Huber, the creator, explains that its great virtue is in eliminating the time-consuming process of sterilization and the danger of infection from improperly sterilized needles.

Upon an expression of interest from medical chiefs of the army and navy, Dr. Huber said he sent samples of the new syringe to Washington yesterday.

"They are always ready for instant use and thus might save many lives in an emergency," the laboratory-minded dentist observed. "They would be factory-filled and sterilized. I believe every soldier should carry one of these in his kit. He would be able to use it on himself or on a wounded comrade."

Dr. Huber said the syringe

could be made, sealed hermetically, for about 14 cents.

The dentist invented and contributed to the government last year a bombing calculator for small warplanes. He said its disposition was a military secret.

AIR MAIL, UNCENSORED KANSAS CITY, (AP)—It's not a military secret—

Painted on an American bomber which landed here for refueling was the sign: "Destined for Berlin."

NAZIS CLEAN POSTOFFICE? KANSAS CITY, (AP)—A

cheery postal card was received here today from John Blanchon, saloonkeeper who was visiting in Paris, France.

It would have been delivered as addressed, to Police Chief Wentworth E. Griffin—except that Chief Griffin died 14 years ago. And, for that matter, Blanchon himself died even earlier, police said.

The card, marked "Rush!" was mailed in Paris, August 18, 1911.

SHOCK, SHOCK, SHOCK TULSA, Okla., (AP)—Lightning

struck at Mohawk park 7 miles from Tulsa giving Walter Grub a mild shock.

At about the same time lightning hit near the Grub home in Tulsa, and Mrs. Grub received a mild shock.

In the same hour, a bolt struck a telephone pole, a mile to the west.

It barely missed son Lloyd Grub.

AREA SEARCHED FOR INFECTED RODENTS

TULELAKE—By order of J. O. McKinney, Yreka, Siskiyou county agricultural commissioner, a crew of men under Dr. Andrew P. Holm has been searching fields and ditch banks the past week for ground squirrels and other rodents that may be carrying bubonic plague infested fleas. Muskrats have also been trapped by the crew under special permit, to check on possibility of the animals

carrying fleas that might spread tularemia.

While no cases of plague have ever been reported here, several cases of tularemia which required medical aid developed among muskrat trappers last winter.

Holm is being assisted by Clinton Hedgpeth and Frank Manceau of the staff of W. H. Anderson, deputy agricultural commissioner.

The program follows a report issued by Dr. Harlin J. Wynn, chief of the bureau of epidemiology of the state department of public health. Squirrels recently taken at five points near Montague and Little Shasta valleys, 70 miles south of here, had

been found to be carrying plague infested fleas, the report said.

To become complacent, to underestimate a cunning, ruthless and resourceful enemy, would be to relinquish a hard-earned advantage in the production of military weapons at the very moment of achieving it.—Philip D. Reed, chief, bureau of industry branches, WPB.
