

NEW NOTCHING MACHINES SET UP AT SPRAGUE

SPRAGUE RIVER — The much anticipated new machinery for notching the millions of board feet of lumber on the government grain bin order has started to arrive at the Sprague Lake Box and Lumber company and is expected to be put in operation at once.

During the past few weeks a large tract of land back of the present mill has been cleared and leveled by a bulldozer. A new railroad spur has been built, power poles erected and various lumber racks constructed. Lumber from other mills has been coming in by railroad and much new equipment has been installed.

When the notching machinery is installed it is expected that the output will be such, that day and night crews working overtime will be needed to load cars, operate the machinery and do the many new duties.

The grain bins are so constructed that practically every board must be notched to fit over another. The side boards are also tongue and grooved, making them fit close together. Unusual about this construction is the fact that a few hundred of nails for the floor and roof is all the metal used. The notching of boards in this manner presented a problem that comes once in a lifetime to a planing mill. Many experiments were tried and new saw arrangements made. Speed was an all important factor and the assembly line idea was worked out. Each man at a notching machine set-up does one thing and the boards move rapidly along to receive treatment.

VALLEY SOIL CONSERVATION GROUP MEETS

LANGUELL VALLEY — The Langell Valley soil conservation district supervisors held a called meeting July 12. Meetings hereafter will be held monthly on the second Saturday of each month at 8 p. m.

The board decided to operate the tractor and land leveling scraper two shifts each day in order to keep up with the increasing demand for use of the district equipment.

M. T. Prince, chairman of the board, stated that approximately 20 owners with about 1200 acres to be leveled, are now waiting to use the equipment and the technical assistance which the soil conservation district furnish farmers who enter into farm plan agreements with the district.

The board also accepted the loan of a marine fire pump with 300 feet of hose from the soil conservation service to be added to their fire fighting equipment, now located at the Bonanza CCC camp.

The board decided to move the land leveling equipment from the east side of Langell valley soil district to the west side about September 1 if possible, to do work on Sander Roviard, F. M. Dearborn, G. M. Loomis, Wilkerson brothers, R. E. Thomas and H. R. Frazier farms.

The Brattains own a home in Port Klamath, and plan to visit frequently from their ranch.

Mrs. William A. Page, who has been assistant postmaster for several years, will continue in the capacity.

The mail is brought from Chiloquin to Port Klamath and Crystal, Ore., by postman Graves of Modoc. Potter has been employed as mail carrier for the past four years on the route.
