FOR SCHEDULES BRIEF RADIO TALK

WASHINGTON, Oct. 7 (P)—President Roosevelt disclosed that, he expected to make a brief radio talk within a week or ten days on perhaps half a dozen or a dozen different subjects.

The chief executive failed to give a press conference a clear cut idea, however, of the general nature of the forthcoming speech or to elaborate on the individual subjects it might embrace.

"Will it be a survey of the war?" he was asked. He said he thought not.

"Will it be a resume of your recent trip?" a reporter inquired. Well, Mr. Roosevelt responded, maybe it will contain a paragraph on that trip, but there really isn't much news left about it.

STATE'S TRAFFIC DEATH RATE DOWN

Oregon's traffic death reduction for the month of August was double the rate of motor vehicle use reduction, figures compiled in the office of Earl Snell, secretary of state, disclosed today.

The traffic death rate for that month was cut 30 per cent, exactly twice the reduction in motor vehicle use, as shown by gasoline consumption, Snell said. The death rate for the month was 7.8 persons killed per one hundred million miles of travel, compared to a rate of 10.8 for August of 1941.

The actual number of deaths was cut from 45 to 23, a decrease of approximately 50 per cent.

For the first eight months of the year, the traffic death rate was 8.3 compared to 10.4 last year, a 20 per cent reduction in the face of a reduction of but 8.8 per cent in the use of cars.

Gasoline consumption for the eight months amounted to 178,204,460 gallons this year, a decrease of 17,357,905 gallons from the consumption through August of 1941.
