SPRINGFIELD HELD ON FORGERY COUNT

LAKEVIEW (Special) — Edward Franklin Springfield, 20, was picked up Tuesday by Sheriff H. A. Casiday on a charge of check forgery which had been relayed from Burns. Springfield, who is originally from Pinos, Penn. had just arrived on the bus in Lakeview when he was apprehended by Casiday.

An alleged two-time army deserter, Springfield was on his way west to Los Angeles when he was given a ride by Alex Geokan of the Steen Mt. section, and was hired by the latter. He worked 10 days and left for Burns.

There he is alleged to have forged two checks, one \$85 and the other \$125. He walked the 10 miles to Burns from the ranch. He told Casiday that he planned to join the air force in Canada and, at another point, declared he was going on to Los Angeles.

No selective service registration card has been found for him to date. The prisoner was held in the county jail here pending arrival of Sheriff C. W. Frazier of Burns.

LOG OUTPUT PEAK REACHED IN LAKEVIEW

LAKEVIEW (Special) — The highest production point reached so far by local operators was noted in a compilation of figures for the lumber industry for the past year. The total production for the six companies operating in Lakeview and vicinity amounted to 118,400,000 feet, which is approximately 15 per cent over any previous year.

In addition to this amount, approximately another one hundred million feet left Lake county in the shape of logs which were manufactured in Klamath Falls, Bly and Bend, it is shown.

Involved in these operations and the total output of each were the following companies: Underwood Lumber company, 25,000,000 feet; Goose Lake Box company, 29,500,000 feet; Anderson Brothers Lumber company, 21,000,000 feet; Lakeview Lumber company, 19,500,000 feet; DeArmond Brothers Lumber company, 8,400,000 feet, and Buzzard-Burkhard Pine company, 15,000,000 feet.

The mill of the Lakeview Lumber company and that of Peterson-Johnson both burned during the operating season. To date neither has been rebuilt. Purchase of the DeArmond Brothers Lumber company was made by the Lakeview Lumber company and it is now being operated under the latter heading.

Moulding plants, cut stock plants, planing mills and box factories worked to capacity throughout the season, giving the county its largest remanufacturing payroll to date. The total payroll from tree to car was about one and one-half million dollars. Close to five million dollars was realized from the finished product.

1942 proved to be the best year so far for the local lumber industry and the labor employed in it, it was reported.

Support Urged for Infantile Paralysis Fund in Klamath

The National Foundation for Infantile Paralysis is again sponsoring a campaign to raise funds. Locally it is sponsored by the Klamath county committee, consisting of Dr. P. H. Rozendal, chairman; M. E. Nicodemus, secretary and treasurer; William Kuykendall, Dr. J. Hilton, Raymond V. Guerrattaz, Rev. Victor Phillips and Elenora Weatherford.

As in former years, a dance will be held at the Klamath Falls armory on Saturday, January 30, music to be furnished by Baldy Evans' band. Tickets to the dance have been mailed out. Even if you do not attend the dance, please send your dollar, or more, to any of the committee members, officials urged.

Fifty per cent of all funds collected remain in Klamath county. Over \$700 was spent in Klamath county during 1942 aiding those who had infantile paralysis. A little over \$300 was spent on one case, a mother of two children who had the disease during the last month of 1941. These funds helped take care of her hospitalization, medical care, and other treatment as indicated. She had paralysis of both arms and partial paralysis

of one lower extremity. Other expenditures included travel expenses for patients entering Shriners and Doernbecher hospitals in Portland. Money was also expended for braces and shoes.

During the past few years there has been much publicity of the Kenny method for treating infantile paralysis. Considerable work has been done in this country in medical schools and hospitals through grants of the National Foundation for Infantile Paralysis. The Kenny treatment is not a preventive or a cure, but is a tremendous forward step in its treatment in preventing painful and crippling conditions once the disease is contracted, it is pointed out.

Due to its importance in treating this disease, the committee feels it would be money well spent to have one trained in this method come to Klamath Falls and give this training to a large number of nurses and physicians. This program should not be limited to a few lectures, but enough time should be spent on it in lectures and demonstrations to equip nurses and physicians in this method of treatment.
