Our hope is to distribute available supplies of rubber and gasoline so that essential war activities may proceed at full speed. Farming, our food production, ranks at the top of our basically necessary war activities. The less essential uses of gasoline and tires must never be permitted to slow down our essential food production.—The OPA.

We speak no longer of defense. That now has passed and henceforth we think of attack—determined, unrelenting, smashing attack. Our troops, Canadian, United Kingdom and those of the dominions and our allies, have chafed at inaction. They will get action.—President Roosevelt.

## NELSON MULLS RESIGNATION AS WPB CHIEF

WASHINGTON, Feb. 17 (AP)—Chairman Donald M. Nelson of the war production board today pondered suggestions, both from friends and foes, that he follow into retirement Ferdinand Eberstadt, the vice chairman he dismissed yesterday.

Nelson told friends he expected to take a week or two vacation to rest up, to think about the possibility of retiring, and also to give complete freedom to Charles E. Wilson, his new executive vice chairman, who has taken over all WPB activities.

**Wilson Favored**  
Among Nelson's friends, the majority opinion seemed to be against resigning, although some of them have advised Nelson to quit in behalf of his health.

If he should resign, however, they favored for his successor Wilson, a self-made man who rose to the head of General Electric company.

**Baruch Suggested**  
Opponents of Nelson, who were reported to have asked the White House for Nelson's scalp, were said to favor 72-year-old Bernard M. Baruch, who held a similar post in the first world war. These opponents were said to include James Forrestal, undersecretary of the navy, who is a close personal friend and college classmate of Eberstadt.

**What's the best air pressure for your tires?**  
For maximum tire wear at speeds 15 miles per hour and under, tire pressure should be increased about 15%.

**How often should your battery be tested?**  
At least twice monthly—and it should always be kept charged. A battery which is allowed to run down too low is very hard to bring back, freezes easily.
