

### Legislature Has Eight Committees To Report in 1945

SALEM, March 11 (AP)—The legislature created eight interim committees which will report to

the 1945 legislature on their findings.

These committees will study the state board of health, administrative procedure of all state agencies, the requirement that self-sustaining state activities pay 10 per cent of their reve-

nues to the general fund, the handling of delinquent minors in state training schools, improvements in state institution buildings, milk prices, whether employers should be compelled to be covered by industrial ac-

cident insurance, and motor transportation taxes.

Uncle Sam's treasury is feeling the restricted use of motor vehicles in the reduced income from excise taxes on automobiles and motorcycles.

### Spring Fishing Starts in Sprague, Williamson Rivers

With spring "just around the corner," Chiloquin residents have resumed their annual mul-

let and trout fishing of Sprague river.

For the past two or three weeks many giant mullet and trout have been taken from the waters of Sprague river. Most of the fishing is done, not with tackle, but with a gaff hook at-

tached to a bamboo pole. This sport requires much skill, for the fish are hooked during a brief glance while fighting their way up very swift water.

Fishing is done near the Chiloquin mill, about one-quarter

of a mile above the Sprague-Williamson river junction.

Veteran of the fleet of Clipper ships is the Yankee Clipper which has flown more than a million miles to cross the Atlantic 235 times.
