LAKEVIEW (Special)—Gene Favell, program chairman of the Rotary club, introduced Thomas H. King, administrator of the Lake Public Welfare commission, who was the principal speaker at Wednesday's noon luncheon meeting.

In introducing the speaker Favell emphasized the failure of a community, as rich in resources as Lakeview, in providing a home of adequate facilities for the aged and the convalescent. He pointed out that these people are now living in a home that is unsanitary, and where adequate nursing care is not available.

## COMMISSION GAVE STEEL TO KAISER

WASHINGTON, March 20 (P)—Shipbuilder Henry J. Kaiser asserts the steel which his California company is accused of accepting in too great quantities "was allocated to us by the maritime commission."

This was Kaiser's reply last night to technical charges of priority violations. Failure to accept delivery of the material, he said in a telegram to War Production Board Chief Donald M. Nelson, would have cut production on ships which the commission was urging him to turn out "as rapidly as possible."

"Apparently we have been building ships so rapidly that it is illegal," Kaiser said in his telegram.

"Do you prefer that we continue to build ships as rapidly as possible or shall we cut down our rate of production to comply with WPB procedure?"
