

Work Begins After The Garden Is In

Good Ground Tillers Watch Out for Pests as Fruits and Vegetables Mature

By MARGARET LAMB
After the garden is in then begins the work. All the time you have been spading the soil and seeding and fertilizing and you begin to think you are going to have a spell to breathe, the bugs and worms and butterflies have been hovering in the background to pounce as soon as the tiniest leaf shows itself. Plants have diseases, too, as being food for bugs. A good gardener must set seriously about combating both.

Asparagus which is a valuable permanent vegetable here is attacked by beetles. It can be sprayed but one grower, Mr. John Roberg of Hood River, has the best luck by turning his chickens in on the field. Mr. Roberg has one plant of asparagus that is twenty-seven years old and is still bearing well.

Rhubarb is a good Victory garden plant, takes up little room, and is attacked by no pests, as a rule. It is easily forced, too, by the home grower as was explained in a previous article.

Beans are apt to be attacked by the twelve spotted beetle when the two first little leaves come through the ground. This is a hard beetle to control but can be driven away by dusting.

Aphids are found on many things and when first seen on the under side of any leaves they should not be neglected, since they multiply very rapidly. Get busy at once with the nicotine dust.

Beets are grown rather easily with few maladies. The flea beetle is found sometimes in the young plants but can be eliminated by using rotenone dust, calcium arsenate or nicotine dust. Black canker which will not be apt to occur in the average Victory garden is treated with borax.

Professor Bouquet, who is the authority for these articles, recommends that the gardener have on hand a good variety of these dusts and sprays, to save time when they are needed.

Nicotine dust or spray may be used on broccoli and brussels sprouts. Cabbage and cauliflower for fall are grown in seed beds and are nearly always covered with lice, maggots, and worms, and it is necessary to dust them as soon as they are set out.

Swiss chard will have the twelve spotted beetle. The ear worm of corn can be controlled by dusting the silks with calcium arsenate dust.

Cucumbers, although regarded as a B-class vegetable by the government, will be grown in most Victory gardens and have relatively no growth problems to perplex the gardener.

Lettuce is very susceptible to the weather. It is good to keep the ground around the stalk dry with mulch to prevent down dropping of the head.

Onions may be infested with maggots or thrips. Peas should be dusted when in flower with rotenone, or if there is none of that calcium arsenate may be used. A good side dressing of fertilizer is very important in producing a good crop of peas.

Maggots infest radishes, and this year perhaps the gardener's energy might as well be spent on something else that has more food value.

Spinach is relatively free from pests but sometimes the flea beetle moves in or the twelve spotted beetle and then the plants must be dusted.

Squash is a fine storage crop. And if treated correctly will keep a long time. Squashes should not be piled up, but stored in a dry place such as an attic.

Beans and peas must be fumigated if they are going to be stored dry. Put them in a gallon jar and pour over them a teaspoonful of carbon bisulphide, and put on a tight lid. They must be aired well before eating.

Root crops need a moist place for storage, otherwise they shrivel. If weather permits they can be left in the ground or they can be stored in the old fashioned root cellar.

Cabbage can be put in a trench and lightly covered with straw and some dirt. Onions keep well if cured in the field before digging.

Vegetables should be prepared for winter at their best, some pass their prime very quickly and must be watched carefully.

Mr. and Mrs. Fred Biehn of 1605 Eldorado street are being congratulated upon the arrival of their third child and first son, born at Hillside hospital March twenty-fourth.

Mr. and Mrs. Alfred Green Brown of Dalton, Georgia, are the houseguests of their son-in-law and daughter, Mr. and Mrs. Warren Whitlock of 607 Roseway drive.

Valley Club Donations

Langell Women's Gift To Red Cross and USO Is Announced

LANGELL VALLEY — The Langell Valley Women's club met at the parish hall on Thursday, for an all day meeting. Each person took a paper sack lunch and fruit salad, cookies and coffee were served by the hostesses, Mrs. Nettie Davis and Mrs. Charlotte Fitzhugh. The women accomplish a lot of Red Cross sewing at these meetings and everyone is cordially invited. The meeting was in charge of the president, Bessie Campbell. A report was given by Mrs. Revell on the money we raised for Commandos. Instead of buying a piece of furniture, the \$32.25 was donated to the fund for paying the fare of wounded soldiers who visit Klamath Falls. Ladies were asked to donate to the unit "snack bar" when possible. It was voted to give five dollars to the Red Cross fund and to send a wedding present to Mr. and Mrs. Herbert Jones, son of Mr. and Mrs. Ed Jones.

A letter was read from Alice Peatross from San Francisco, whose health is much improved. The next meeting will be with Bessie Campbell on April the twenty-second. Each one is to take a sandwich and the hostess will furnish dessert and coffee.

Those enjoying the day were Bessie Campbell, Grace Revell, Florence Botkins, Nolie Peppie, Mary Dearborn, Madge Monroe, Norma Campbell, Myrtle Johnson, Theresa Teare, Rebecca House, Eva Roberts, Mary Leidy, Genevieve Smith, Bessie Frazier, Cora Leavitt and the hostesses, Charlotte Fitzhugh and Nettie Davis.

By RITA WHISENANT Licensed Cosmetologist

SPRING and summer this war year will see more women outdoors than ever before. That you're spending many hours in the garden doesn't mean that beauty must go by the board... not if you'll practice a few precautions.

Sun, wind and dust are the enemies, here in Klamath, of woman's crowning glory. Unless you take care of your hair during the outside days, it will take all fall to get it back into shape.

When you let your hair fly in the wind you are letting the natural oils of the scalp dry out faster than nature can replace them. A headgear that is light in weight and porous, to allow circulation to carry on, is the answer. Tight bandanas interfere with circulation. To give your locks that vigorous, alive-look, brush them at least that old-fashioned hundred strokes a day. Keep your circulation stirred up and let the blood rush to the scalp. The oil will be distributed by correct brushing.

CLEANSE the dust and perspiration from your hair by daily brushing and use a liquid cleanser that is mild and effective. After you once get in the habit of this daily treatment you'll notice such an improvement in your hair that you won't be without a bottle of this cleansing liquid, which makes soap and water cleansings occur less frequently on your schedule.

To keep the sun from giving your hair the feel of hay, use a light oil protection. The oil I have in mind can be sprayed on with an atomizer. It will keep the hair from burning and at the same time will let your hair and scalp get the good from the sun.

YOUR hair is your crowning glory and plays an important part in your beauty program. Please feel free to ask me any questions on its care, or on any beauty problem. Morale is a woman's job.
