The web tightens around the "producer" through the entire play until he finally is entangled completely.

WOOL BUYING PROGRAM SET FOR DURATION

WASHINGTON, April 6 (47)-Wool growers who want the government to take over the nation's entire wool clip for the duration will get what they want under the agriculture department's long-range program, So predicted Chairman O'Mahoney (D-Wyo.) of a special senate wool committee last night.

Saturday the department announced only a price-supporting program for the 1943 clip. O'Ma-honey told a reporter that prior to the formal announcement, department officials told his committee in a closed session that the department's long-range plan was to buy the whole clip as a means of assuring an adequate wool supply, during the war and for a time thereafter.

"It was the understanding of every senator at the meeting Saturday," O'Mahoney said, "that the plan of government purchase of the clip during the war, as approved by numerous growers' or-ganizations, would be carried

Sen. John Thomas (R-Idaho a member of the committee and a large wool grower himself, said this was his understanding.

O'Mahoney and Thomas said move through regular channels But he said, the government will become the "central buyer" for all who need wool.
