

NEW RATION BOOK WILL BE ISSUED SOON

WASHINGTON, April 15 (AP)—OPA officials disclosed today that ration book No. 3 will be issued soon, probably late in July, but will be used primarily for shoes, sugar and coffee as soon as book No. 1 runs out of stamps.

The No. 3 volume issue also may be used to provide a couple more months of canned goods and meat stamps, since it was designed to handle both point and unit system of rationing.

Officials said they had no intention of using the No. 3 book to ration any new commodities, but could make no promises because of the theoretical possibilities of special emergencies.

Books 4, 5 and 6 are in the design stage, so No. 3 probably would not be needed for new rationing if any did become necessary.

Because of their plan to use No. 3 book only as a replacement, OPA also is trying to figure some easy way of distributing it, and odds today are that it will be handled by mail.

The new book already is printed and stored in warehouses at strategic places throughout the country. All that remains to be done is to send the books on to the local ration boards to hand out or mail out.

The volume has two kinds of stamps. In one group are four series, one bearing pictures of tanks, another aircraft carriers, a third airplanes, and a fourth field artillery. These are likely to be used for shoes, sugar and coffee—the tank stamps for shoes, perhaps, as an example.

In addition the book has four pages of point stamps similar to the canned goods and meat stamps in Book 2.

ICKES RELEASES JAPS FOR FARMING

WASHINGTON, April 15 (AP)—Secretary of Interior Ickes said today he has negotiated the release of three American-born Japanese internees to work on his Olney, Md., farm because he wants to help ease their lot and because "we need competent farm help badly."

In addition, Ickes arranged for release of four other internees from the Poston, Ariz., camp of the war relocation authority who will work for the owner of an adjacent farm, Sam Rice, former Washington baseball player.

Three married couples and another man make up the seven.

Administration Controls Main Potato Shipping

WASHINGTON, April 15 (AP)—The food administration has taken control over the shipment of the remaining stocks of Maine potatoes, saying the action was designed to enable government procurement agencies to obtain urgently needed supplies and to help provide growers with sufficient seed for 1943.

The order requires each shipper to obtain a permit before making any truck or rail shipment.

Roseburg Was "Hotbox" of State During Last Week

PORTLAND, April 15 (AP)—Roseburg, with a maximum of 87, was the state's hotbox during the week ended April 13, the U. S. weather bureau reported today.

Portland was a close second, with 85 recorded on Monday. High temperatures were general throughout the state, with only one station reporting below 70 degrees as a maximum. That was North Bend with 65. Several points reported below freezing minimums, with Bend at the bottom with a low of 18 above.

Seeding of spring grain and reseeded winter wheat fields killed by cold were completed during the week, and summer following is in progress. Grain was reported to be making satisfactory growth generally.

Pears, peaches and apricots were in the peak of bloom in warmer regions, with no frost damage reported. Conditions

were generally good over the state. Backward pastures showed some general improvement during the week, and hay crops were making a good start.

Planting of Victory gardens, early potatoes, peas and sugar beets made good progress, the bureau reported.
