

NIPPONS HINT OF AUSTRALIAN INVASION SOON

(Continued From Page One)

but U. S. troops continued mopping up stragglers who hid in the jungled hills.

The navy did not say whether the enemy group were stragglers or a military patrol put ashore—perhaps to scout American defenses as a prelude to a new Japanese offensive.

Fliers Blast
A navy communiqué said American fliers blasted enemy positions in widespread attacks through the Solomon Archipelago, raiding Kahili in the Shortlands, Kolombangari and Munda.

Allied warplanes, breaking through a strong screen of Japanese Zero fighters, violently attacked Japanese barracks, hangars and seaplanes at the former Dutch naval base of Ambonia 600 miles north of Australia, Gen. Douglas MacArthur's headquarters said today.

Three of 15 Japanese interceptors were shot down or damaged, a communiqué said, and the entire formation of U. S. Liberators returned safely.

Timor Hit
Coupled with this attack, Dutch-manned Mitchells set fires at Koepang, capital of Dutch Timor. Other allied planes struck at the Tanimbar islands and New Guinea.

On the Burma front, British headquarters reported that sharp local fighting erupted along the Bay of Bengal coast, with alternate attacks and counterattacks by Japanese and British troops, but the situation as a whole remained unchanged.

RAF warplanes bombed and strafed Japanese troops, attacked villages around the big enemy base at Akyab, and hit rail lines, river steamers and other targets.

AMERICANS SMASH NAZI TROOPS BACK

(Continued From Page One)

road to Mateur. Fields and roads about green and bald hills there were found sown with hundreds of mines and booby traps.

A military spokesman said the American forces launched an attack four miles east of Sidi N'Sir against German gun emplacements on hill 601—Djebel Tahent—which dominates the valley extending 16 miles north-eastward to the Mateur road junction, but met strong resistance and failed to reach the summit.

Counter Attacks
Nazi troops counterattacked repeatedly against U. S. lines south of the hill, but all the thrusts were repelled.

Gen. Sir Bernard Montgomery's eighth army mounted a local attack on the southern front and gained its objective, the communiqué announced, adding that "an enemy counter-attack in this sector achieved slight success."

German tanks and infantry struck heavily again at first army lines in the Medjez-el-Sektor, but the communiqué said that, with the exception of one small gain by the enemy in the Medjerda river area, all attacks "were repulsed with heavy loss to the enemy and our forward positions were maintained."

WORKERS ASK AGREEMENT, BARGAINING

(Continued From Page One)

pute is certified to the WLB, there is nothing to prevent the parties from continuing negotiations voluntarily without government participation.

Also, it was pointed out, the WLB sometimes "uncertifies" cases, returning them to the conciliation service when panel hearings develop that successful bargaining still is possible. However, even a negotiated wage agreement has to go to the WLB under the wage stabilization program.

John L. Lewis, UMW president, made public the reply after a session of the international policy committee of the union. Lewis handed newsmen the text of the committee's message to the president without comment, and declined to answer questions.

Voluntary Stoppage
Several union district presidents who are members of the policy committee and who were interviewed after the meeting said the telegram meant that in the absence of an agreement there would be a voluntary stoppage of work in the mines at midnight tonight when the president-extended contract expires.

Any walkout would affect approximately 450,000 soft coal miners in the Appalachian joint conference. The UMW always has taken the position that they never work without a contract, and Lewis has said during the wage negotiations which began early last month that in the absence of an agreement the miners would not trespass on mine property.

WLB Told
The message said in part that the war labor board "would and could not do other than to apply its fixed mathematical measuring device to the existing wage structure of the bituminous coal industry, and deny our every request."

"We maintain," the message asserted, "that such a conclusive action conceivably would not be a decision based upon the equities of the miners' case. Admittedly it is in contravention of the very principles of equity and justice upon which American law is predicated and which makes of our courts the great free institutions they are."

"It turns a deaf ear to the pleas of a half-million of America's finest industrial soldiers, and their several million dependent wives and children who daily find their living standards being lowered to the point of despair by mounting prices of foodstuffs and the essentials of life."

SPRINGFIELD, Ill., April 30 (AP)—There will be no strike by Progressive Mine Workers of America, the union's policy convention decided here this afternoon, voting to continue contract negotiations with operators for 30 days. The union, an AFL affiliate, claims to represent 21,000 miners in Illinois and Kentucky.

SEATTLE, April 30 (AP)—Washington state's 2450 soft coal miners will cease work at midnight if no agreement is reached in the Appalachian soft coal industry dispute, Richard Francis, district secretary-treasurer for the United Mine Workers, announced today.

"The district is not calling a strike," he said, "but the miners

Japanese Fight Raid Fire

This picture, appearing in an April 19, 1942, edition of the Japanese newspaper Yomiuri, is described as showing fire fighters at work after the U. S. army air raid of April 18. Photo is from a copy of Yomiuri obtained recently by the American magazine Newsweek, which said it had been smuggled out of Japan.

lent an action in that area. The Russians generally have omitted mention of campaigns until they were under way for some time.

Hold Bridgehead
(The Germans hold a narrow bridgehead on the Black Sea coast and in the Taman penin-

sula across Kerch strait from the Crimea).

The Germans were reported to be moving up reinforcements, munitions and supplies in all sectors, but Nazi train and truck communications were being struck heavy blows by the Red army, and in places where Russian artillery could lay down their shells the big guns were pounding the German concentrations. It was said.

The destruction of 77 German planes in two days, west of Krasnodar in the Kuban valley, gives some insight into the terrific air war.

An Ohio boy was born with four teeth. That's starting life's grind rather early.

LOGGERS GET OPA OKAY TO BOOST PRICE

(Continued From Page One)

SEATTLE, April 30 (AP)—The office of price administration has authorized western Oregon and western Washington contract loggers who operate 48 hours a week to make the same maximum price increases which sellers of west coast logs have been permitted to make since last September for production under overtime conditions.

The effect of the order, Dr. James K. Hall, state OPA price officer explained, is to allow the sellers of logs to pass on the additional receipts to the contract loggers who actually incurred the overtime expense.

The specific additions to price ceilings are \$1.00 per thousand feet under a 48-hour schedule; \$1.50 if produced under 54-hour operations, and \$2.00 for 60-hour work-week conditions.

Martinique Consul Called Home, All Agreements Revoked

(Continued From Page One)

effectively stripped under an agreement with the United States, however, that even if he wished, Robert could not put them into service against the United Nations.

Food shipments from the United States to the island, famed in history as the birthplace of Napoleon's Empress Josephine, were halted November 8. The conclusion drawn at the time this was announced, in March, was that the United States was weary of Robert's attitude and, he could get his groceries elsewhere.

"It is a matter of common knowledge," the note said, "that the territory of metropolitan France, contrary to the wish of the French people, is being used in an ever increasing degree for active military operations against the United States and that the Vichy regime is now an integral part of the Nazi system."

"The government of the United States does not recognize Vichy nor will it recognize or negotiate with any French repre-

sentative in the Antilles who remains subservient to or maintains contact with the Vichy regime.

No Binding Talks
"In the circumstances the government of the United States does not consider effective or binding any informal understanding with respect to the French Antilles based upon past discussions and conditions, nor does it consider that those discussions can serve as a basis for either present or future relations with the French Antilles."

EDITORIALS ON NEWS

(Continued From Page One)

President Roosevelt came down to this patch himself and told these men to go back to work without an agreement they'd tell him: 'Go back to John L. Lewis and get an order FROM HIM. Then we'll go back to work.'"

LET'S wait and see what happens tomorrow, when FDR's ultimatum expires.

Public opinion is a powerful weapon. The President has it on his side in this threatened coal strike.

THE coal miners' weekly earnings are rather low as present war wages go—running not much in excess of \$40 a week.

But they're working only five seven-hour days, or a 35-hour basic work week. It's pretty hard to earn war wages on such short hours.

The 35-hour work week is designed to SPREAD WORK in periods of depression—not for the all-out production made necessary by war needs.

THE sport world is all twittered up today over the Kentucky derby. Which is doubtless as it should be. Going around with long faces doesn't necessarily win wars.

Still, one wonders how he would feel about all this derby hullabaloo at home if he were down in the South Seas as a part of our inadequate forces who are holding their fingers in the dike trying to keep back the Jap flood.

A major change expected in trucks is a lighter engine with greater horsepower in proportion to weight as compared to present engines.

Hans Norland, Auto Insurance.

Residents of Shasta way have circulated a petition to the county court urging immediate action toward improvement of that street.

The petition was signed by 121 persons in four hours, according to H. C. Harris, 4358 Shasta way.

Members of the county court said Friday that the county road department is filling chuckholes on Shasta way and Allamont drive with gravel, in an effort to relieve the situation on those streets.

They said they hope another oil coat with additional gravel may be spread on the two streets later in the year, but this depends on the availability of oil.

Postoffice Finds Bomb Addressed to Father Coughlin

NUTLEY, N. J., April 30 (AP)—Postoffice employees found in the mails today what an official described as "a good bomb" addressed to the Rev. Charles E. Coughlin at Royal Oak, Mich.

Father Coughlin is the nationally known priest of the Royal Oak parish's "Shrine of the Little Flower." He was last in the news about a year ago, when postal authorities suspended mailing privileges of his magazine, "Social Justice," on the ground it contained subversive statements.

Roosevelt Signs Appropriation For Land Army

WASHINGTON, April 30 (AP)—President Roosevelt signed today legislation appropriating \$25,000,000 to finance a land army to meet farm labor shortages in various parts of the country.

The labor will be recruited and assigned largely by state and federal extension services. The amount appropriated was a reduction of approximately \$39,000,000 from budget estimates.

Thomas Jefferson, after observing the custom in Europe, introduced finger bowls into America.
