Most eminent authorities contend that 90% of all chronic diseases are due, in most cases, to pollution of the blood stream via improper function of the colon, over-taxed kidneys, etc. In most cases a functional disorder causes constipation. To get at the bottom and basic cause of a large number of ailments that have heretofore resisted the best efforts of all branches of healing, I have installed the remarkable TOX-ELIMINATOR. This instrument has been used in other sections of the United States for some time with remarkable results prior to its introduction in the Pacific Northwest.

The Tox-Eliminator treatment, by removing the disease-producing materials at their foundation head, helps the body to stop further damage and rebuild the affected parts and restore them to normal. Causes of irritation and numerous infections are removed. The TOX-ELIMINATION treatment is pleasant and not embarrassing. It is leak-proof and odor-proof because the entire process takes place under watertight and airtight conditions. It has no disagreeable features whatsoever, nothing that might offend a person of the most fastidious taste and sensitiveness.

**THIS NATURAL, DRUGLESS THERAPY ACCOMPLISHES THE FOLLOWING:**

1. Cleanses the colon thoroughly and in a harmless manner.
2. Massages the bowel and gives necessary tone to tissues involved.
3. Its employment of oxygen destroys the anaerobic germs, which cannot live in this medium.
4. Purifies the blood stream; proved by microscopic examination after treatment.
5. Relieves rheumatism, arthritic and neuritic pain, often in one treatment.
6. Reduces hypertension or high blood pressure, thus easing the work of the heart and freeing its cells, and the brain from undue strain.
7. Inducates to patients what foods to avoid to insure maximum efficiency in digestion.
8. Lessens the burden thrown on the liver and kidneys.
9. Reestablishes a normal peristalsis, or natural muscular activity of the intestines.
10. Improves sinus and antrum complications in a few treatments.
11. Insures a good complexion by eliminating causes of poor complexion from the blood.
12. Assists in preventing the hardening of the arteries by minimizing the deposits of calcium and magnesium salts on arterial wall.
