SUPPOSE IT HAD TO LAST A LIFETIME

HOW CAN you take steps to make sure your car will last through the duration?

The simple way is to treat your car as if it would have to last a lifetime! As if you never would be able to get another!

Keep your engine properly tuned! Change oil promptly—and no fooling! Watch plugs—brakes—batteries—carburetors! Really DO the things you know SHOULD be done, but have found you can "let slide" under peacetime practices of trading in every two or three years.

It isn't as much bother as you think. Because we'll take over the job of making your car last if you'll give us the chance and work with us.

We've got the men, got the equipment, got the know-how to do it. How about coming in to talk it over?
