U.S. AIRBASE ESTABLISHED ON AMCHITKA

(Continued From Page One)

ka. Previous to the occupation the island the island Akad in the Andreanof islands had been occupied by American forces, (Occupation of positions in the Andreanofs was announced in navy communique No. 138 on October 3, 1942.)

"The announcement of the oceupation of Amchitka has been held until our positions on the island were fully consolidated.
"2. The occupation of Amchit-

ka and Adak were unopposed by the enemy. In the occupation the weather presented the great-est obstacle, causing damage to landing craft and privation to personnel in the early stages of the operations. In later periods the positions were subjected to air reconnaissance by Japanese aircraft and bombing attacks. (Reconnaissance and bombing flight by enemy planes over United States positions in the western Aleutians were reported in communique No. 268, 273, 281 and 287.)
"3. On May 5th army planes

carried out six attacks on Jap-anese installations at Kiska. Lib-erator (Consolidated B-24) heavy bombers, Mitchell (North Amer-ican B-25) medium bombers and Warhawk (Curtiss P-40) fighters participated in these raids. Hits were scored in the Gertrude Cove, main camp, north and south head, submarine base and beach areas. A number of fires were started and one building was destroyed on North Head.
"4. On the same day, Attu
was bombed and strafed four

times by Liberator and Mitchell bombers and Lightning fighters. Hits were scored on Japanese installations and one enemy plane vas destroyed."

Benson, Marsha Named in War Department Notes

"A light bombardment unit including two Pacific northwest airmen, has dropped nearly 3,000,000 pounds of explosives on German and Italian troops in several hundred sorties which played a large part in breaking axis resistance in North Africa. "Airmen at this field, the most

experienced light bombardment unit in the American air force, have flown their A-20 Boston bombers with a loss of less than one per cent, a feat equalling that of the heavier Flying Fortresses. They have worked in such close support of American and British armies, that their bases are moved almost as often as the
