you or I may be required to do something to preserve our privilege of driving. It's called the Financial Re-

sponsibility Act . . . And if you don't know whether your present automobile insurance policy protects you, you'd better ask Katherine . . Because she seems to know all the why's and wherefores.

She said that several of her friends, whose husbands have gone into the service and left the gals with the responsibility of their cars, have found out recently that they didn't have the automobile insurance they thought they had.

FARMERS GET TOP PRIORITY FOR SUPPLIES

By OVID A. MARTIN WASHINGTON, May 13 (P)-revamped farm machinery production program raising food to a No. 1 priority level with munitions and weapons is being formulated by the war produc-tion board and food administration.

This was disclosed today by M. Lee Marshal, deputy food administrator in charge of supplies, machinery, equipment, materials and facilities.

Enough steel and other ma-terials will be made available for farm machinery, beginning about July 1, to allow an output for 1944 crop use equivalent to about 80 per cent of 1940 pro-duction. Manufacture of machinery for this year's crops was held to less than 40 per cent of the 1940 volume under a WPB allocations program which gave munitions priority over food production supplies. Marshall said be expected de-

tails of the new machinery pro-gram to be announced soon to allow manufacturers ample time
