# **Tuberculosis in** Newell Japanese **Presents Problem**

Calif.

By WENDELL WEBB TULELAKE, Calif, May 25 (P)—A new aspect to the prob-lem of Japanese ovacuces—the possible permanence of tuber-culosis sanitariums — presented itself with a visit to this largest single releasing project in the single relocation project in the

In the 225-bed hospital, built to care for this new city in the high, lake-bottom valley of northern California, are 58 cases of pulmonary tuberculosis. In barracks constituting an isolation ward are another 60 or so arrested cases under observation.

And the situation is not unlike that at the nine other reloca-tion centers now operating in California, Arizona, Utah, Col-orado, Wyoming, Idaho and Arkanses.

### 14.000 Evacuees

Around 14,000 evacuces from the western defense command now are quartered here, nearly 90,000 more at the other sites. Some of the advancen cases of pulmonary tuberculosis here

never will leave the place alive. Others will necessitate prolonged

(Another 300 persons of Jap-anese ancestry having the disease have been given evacuation de-ferments and are staying at public and private hospitais in the western defense command out side of relocation centers.)

persons-American citizens and otherwise-who not only would die if their continued segregation and proper care were not arranged, but who also could spread the disease to hundrens of others.

Some of those ill have no money with which to buy facili ties for proper treatment and who, from a health stanapoint, should not be moved. For these, there seems but one answerat several of the relocation centers now in existence. Such a set-up now is in the discussion stage.

### No Epidemic

From 160 to 180 persons usual-ly are hospitalized here. There is no epidemic. Disease in the main, with the exception of eye trouble, has little if any higher incidence than in other cities of similar size. The center has one Caucasian

doctor-Dr. R. M. Pedicord of

Wheeling, W. Va., chief medical officer; three evacuee doctors and three evacuee medical stu-

Japanese Assistant Dr. Hashiba came from Japan 40 years ago, was graduated from Stanford, and now, in late mid-dic-age, finds himself evacuated from a practice which bought and maintained for him a \$35,000 home, to a \$19-a-month income paid skilled workers in the center.

dents. There are also 10 evacues dentists.

dentists. Dr. Pedicord's chief assistant in the rambling, army-type hos-pital is Dr. George Kinomatsu riashiba, formerly of Fresno, Calif

He had no complaints when a reporter visited him in his oneroom home here, with his med-ical books in packing-box book-

cases lining the walls. But he'd like to visit Fresno to get more books and surgical insuruments he left there. Dr. Pedicord, who described

himself as "too old for a com-mission," said he was satisfied to leave his practice and \$42,000 home in Wheeling so long as he was being of service in the job he was asked to accept.

Funerais Most persons who die here are cremated or buried at their tormer homes. There is a little sand lot set

side of relocation centers, Study Future aside as a cemetery. In it are only four little mounds, for four time when the centers might close, are studying the future of wooden fence, the others are wooden fence, the others are marked by artificial flowers. Far to the southeast looms great, snow-capped Mt. Shasta.

## Hildebrand

Mr. and Mrs. Roy Shoemaker and children, Joan and Donald, of Klamath Falls, visited on Tuesday evening with Mrs. Shoe-maker, mother, Mrs. Vernon Heath and their uncle and aunt, Mr. and Mrs. Emile Egert. Mrs. S. K. Hartzler and daugh ter, Bessie, visited on Thursday

at the Michael home. Clarence Parker was transacting business in Klamath Falls or

Wednesday. Marvin Michael hauled a load of rye to Klamath Falls on Wednesday.

Goliath frogs have bodies 12 inches long, exclusive of their long legs.

## HAVE YOU Lost Your Axe?

A lot of us have! The fellow who used to run his own truck and swing his own axe, cutting body and limb wood for you, is one. Those still swinging an axe, like the husky above, are working on timber that goes to Uncle Sam.

That leaves the whole job of providing fuel-providing you comfort for next winter's freezing weather—up to us wood dealers. Since 1912, Peyton has handled mill run slab, the old standby which now comes into its own -the all-purpose fuel to warm you and cook for you next winter.

You won't go cold --- if you order all you need NOW!
