

EMPLOYMENT SET-UP TO BE REORGANIZED

TULELAKE—A re-organization of the labor distribution project for this area in Modoc county was announced at the farm center meeting this week by Jack Hays of the Modoc county agriculture office. Hays stated that a new office under the management of Frank Poock will be opened at Alturas to handle recruitment of local volunteer labor. The new office will have no jurisdiction over alien labor brought into the basin. It is understood.

Local farmers regret the change in the set-up which for the last several years under E. W. Scammon of the California employment service, has resulted in a highly satisfactory cooperation between Scammon and local farmers. The change, it is reported, was ordered by the U. S. department of agriculture. The new office will be located near the bank building in Alturas.

Albert Larson, who recently attended a 3-A meeting in Alturas, explained group insurance. Chester L. Main, president of the Tulelake Growers, discussed the need for a labor camp closer to the Modoc county district and farmers will seek establishment of accommodations, possibly at the Carr school. Main stated that the CCC camp now being used for Mexican laborers will accommodate only 500 and will not be large enough for the influx of laborers next fall.

Establishment of a camp nearer to farmers located in Modoc county would result in a saving of time, rubber and gasoline.

A community picnic is planned for the Fourth of July, the affair to be held on Sunday at some place yet to be designated. Lester Vernon will seek a spot close enough to be available for anyone who cares to attend. The Homestead club will solicit enough food, Mrs. Carl Jensen will be responsible for a program of sports and entertainment and the farm center will furnish coffee, sugar and ice cream.

Business of the center will be taken care of at that time and unless a call meeting is decided upon there will be no meeting in August.

Stamp 18 for Shoes Must Last Through October 31

WASHINGTON, June 12 (AP)—The office of price administration (OPA) announced today that the new shoe ration stamp which becomes valid next Wednesday must last civilians through October 31.

The stamp is No. 18 in the sugar-coffee book. Stamp 17, first of the shoe ration stamps, expires Tuesday night.

The new stamp will have to last for four and one-half months, which is 11 days longer than stamp 17. However, OPA said that the dates were in line with the policy of providing an

average of three pairs per person per year.

As in the case of stamp 17, stamp 18 will be transferable within a family so that, for instance, a parent who does not need his stamp may use it for a child.

The announcement disposed of unofficial reports that OPA would encourage the use of the No. 18 stamp for the purchase of white summer shoes. While OPA has no objection to anyone buying any kind of shoes he prefers, it made it plain it is not providing any extra stamps for such a purpose.

Deadly Hemlock Cultivated As Ornamental Plant Here

Poison hemlock, a deadly poison when taken internally, has been reported to be growing in town and in outlying districts by the county agent's office. The ferny, dark green weed is sometimes grown for ornament around houses, Bob McCambridge, assistant county agent, said.

Poison hemlock, also known as poison parsley, poison stinkweed, wode whistle, snake weed, or deadly hemlock, has been reported in this area for several years. Two years ago a calf died from eating some of the weed in a suburban area.

At this time, the weed is about four feet high. It has alternating fern-like leaves, and white flowers. Because of its ornamental appearance, poison hemlock is quite often cultivated around houses and is frequently spread when cuttings are passed for cultivation.

The weed should be cut down as soon as it is discovered because children frequently play with the weed and make whistles or bean shooters from its hollow stem.

Conium Maculatum, its botanical name, can be controlled by keeping down the growth and by keeping the seedlings, which appear each year, cut out. In about two years the condition should be remedied.

Although it has been reported around homes in Klamath Falls, the weed usually grows at the borders of fields, meadows, roadsides, and in waste places. It usually grows in rich, gravelly, or loamy soil. McCambridge stressed that the weed is dangerous, a deadly poison, and should be recognized and destroyed immediately.

Elliot to Lead Trade Group

Members of the executive committee of the trade bureau have elected C. S. Elliot, manager of the J. C. Penney company, as chairman of the retail trade committee of the chamber of commerce.

Rudy Jacobs was selected vice chairman of the same committee.

KLAMATH-MODOC WORK FAVORED

The Klamath-Modoc reclamation project is among six being considered by the senate appropriations committee for funds to be used for resumption of work. The funds were approved by the budget bureau.

Senator Johnson and Millikin of Colorado said the projects involved in the recommendation were the Colorado-Big Thompson, the Klamath-Modoc, the Central Valley in California, the Amberson Ranch in Idaho, the Lugert Altus in Oklahoma and the Roza in Washington state.

Millikin, who is a member of a committee of western congressmen which has been working to lift the stop order imposed last October by the war production board against all reclamation construction, said the board is still studying the question of using materials for this work.

Allowances submitted by the budget bureau and approved by the president are: Klamath-Modoc, \$420,000; Central Valley, \$8,000,000; Colorado-Big Thompson, \$3,500,000; Anderson Ranch, \$3,000,000; Lugert Altus, \$1,500,000; Roza, \$865,000.

If the committee approves, the amounts will be inserted in the interior department appropriations bill, now under consideration.

If the 1942 rate of shoe buying in this country had been continued in 1943, sales would have exceeded shoe production by at least 100 million pairs.

Industrial Mishap Fatality Reported

Included in a list of three fatalities reported by the state industrial accident commission was the name of George Carter, a Klamath Falls dishwasher, who died about two months ago from a heart condition following an operation for hernia.

Carter slipped on the soapy floor while he was working and had a rupture, for which he was operated on. He was injured February 20, the report said.

MAYOR PROCLAIMS WAR SERVICE DAY

Tuesday, June 14, has been declared "War Service Day" in Klamath Falls by a proclamation by Mayor John H. Houston. The proclamation was issued in recognition of the Southern Pacific "War Service Day" on June 14, during which all employees are to pledge devotion to their war time obligations in tribute to the 12,000 men and women who have left the Southern Pacific company to serve in the armed forces.

The proclamation recommended "to the citizens of the city of Klamath Falls that they join with the employees of the Southern Pacific in pledging their unstinted support to our fighting forces."

A worker at a California aircraft plant has worked out a machine operation which can be performed by a trainee and triples output.
