

"You Bet I'm Going to Own a Miracle Home"

Says War Worker George White

"THE WAR BONDS I'M SAVING UP TODAY WILL BUY IT FOR MY FAMILY TOMORROW! I'm earning good money and I'm putting every dollar I can into the fight now. After the war, those bonds will buy us the kind of a home we've always wanted—thanks to the building industry's plans being made now. They're going to give the average American more home for his dollars than he's EVER been able to buy before!"

**YOU'VE GOT THE RIGHT IDEA,
George White . . .**

And we in Klamath—in cooperation with the entire building industry—have dedicated ourselves to bringing millions of families like yours the "Miracle Homes" they've always wanted, when victory is won.

This home typifies the new livability your dollars will buy. Its spacious sun-drenched rooms will be surrounded by gardens, where your children can grow up healthy and happy. The "multipurpose" garage will contain a modern laundry and drying room for Mother . . . a play room for the youngsters . . . a work bench and a hobby room for Dad.

All rooms will be on a single level, easy to clean and take care of. Floors of wood impregnated with plastic will have a permanent, beautiful surface that NEVER needs refinishing!

The air will be filtered free of dust and dirt, heated in winter by tubes hidden in the floors, and cooled in summer by well water circulating in these same tubes! Wonder products born of wartime research will increase healthful comfort, yet reduce construction costs amazingly.

All these and many other miracles of better living await you—so keep buying War Bonds today, and EARMARK THEM FOR THE DOWN PAYMENT on your "Miracle Home" tomorrow!

War Savings Bonds Will Buy a Miracle Home and Will Speed the Day You Move In!

Right now the Kiwanis club is winding up a month's Bond buying program, to provide enough money to buy four fighter planes to escort the "Klamath Pelican."

It gives great satisfaction to those of us at home to know that the money we put into Bonds is doing double duty. It provides wea-

pons for our sons and brothers doing the fighting . . . it provides the savings with which we'll ALL enjoy a better tomorrow.

Remember, the same printing press prints the dollar bill and the War Bond. The dollar bill costs a dollar, the War Bond dollar costs six bits!
